In The Name Of God

The two-volume directory in front of you will introduce more than 30,000 companies including economic operators in commercial, industrial, mining and agricultural sectors across Iran.

Our beloved country owes its economic prosperity and livelihood to their wisdom, smartness and untiring efforts.

The companies compiled here are not only categorised according to their activities, but also their contact details have been mentioned separately.

Economic operators from across the world can choose their preferred Iranian partner to negotiate with and forge trade relations.

The important point here is that all the companies listed in this directory are members of Iran Chamber of Commerce, Industries, Mines and Agriculture (ICCIMA) and are actively engaging in economic activities with commercial cards, accredited by the ICCIMA.

International economic operators can consider this two-volume directory as the reference for Iranian economic community.

The first volume introduces commercial companies of the Islamic Republic of Iran while the second volume lists and presents companies active in industrial, mining and agricultural sectors.

I hope that this directory, which has been compiled tirelessly by the ICCIMA, can reach its goal of opening a new chapter of new cooperation between Iranian and international economic operators. It also aspires to be the first step to promote economic relations and open new window in international trade.

Mohammad Reza Ramezani
Former ICCIMA Secretary General

Overview

With a population of 80 Million, Iran has the World's 18th Largest economy and enjoys huge infrastructure potentials in terms of natural resources and educated young population.The oil industry is considered Iran's most important industry, making its economy Largely dependent on oil revenues.

Some of Iran's advantages in terms of natural and mining reserves are as follows:

- Economic diversity and rich oil and hydrocarbon reserves.
- Being the 5th oil producing country in the World.
- Having the World's Largest gas reserves.
- Enjoying the Largest industrial base in the MENA Region .
- Ranking 4th and 10th in global zinc and cobalt production, respectively.
- Having the World's Largest aluminum, manganese and copper reserves.
- Ranking 4th globally in terms of agricultural product variety.

ICCIMA

Iran Chamber of Commerce, Industries, Mines and Agriculture known also as the parliament of private sector, is the largest private sector association in Iran. Providing technical and commercial services to more than 60,000 members, ICCIMA enhances trade facilitation and doing business in Iran and with it's Public-Private Dialogue System, ICCIMA play a key role in macro-economic policy-making and the development process of the country. The ICCIMA Arbitration Center, as an alternative mechanism for the judicial system, resolve trade conflicts of the members through a much easier process.

ICCIMA is also the umbrella chamber for 34 provincial chambers throughout the country, and is also the chapeau of more than 200 Gilds and Unions. Provincial chambers work as a congressional union for all businesses and closely cooperate with responsible government officials in the province level. The Guilds and Unions also take care of special issues of different sectors and have the responsibility to resolve sectoral problems.

Regarding the foreign trade, ICCIMA issues the Commercial Cards and TIR Carnets, by the help of which ICCIMA members would be allowed to take part in import and export of the goods and also transport services.

Cooperating closely with foreign national chambers, ICCIMA also establishes Joint Chambers of Commerce which is a bilateral mechanism for trade promotion in international level. The establishment of 34 Joint Chambers of Commerce with nearly all trade partner countries, support and reinforce the private sector activities beyond the national borders.

Mah Protein Co.,Ltd : Ali A. Mahdi, Managing Director

Iran's National Award of Top 50 Exporters for two consecutive years

Mah Protein Company was founded by late Gholam Ali Mahdi, a man with love of sea, and with a high passion for production and entrepreneurship in Iran's seafood industry.

Having seen the deprivation of hardworking fishermen in the southern Bushehr Province, Late Gholam Ali Mahdi, along with his three Sons, founded Mah Protein Company in 1991 and has been able to revive the fishermen's main position so far.

"Mah Protein Company, with more then 27 years experience , are the pioneers in the Iran seafood industry. Having Two seperate Processing-Packaging-Factories in Tehran & Bushehr provinces, with a capacity of freezing 85 tons of fish and shrimp per day, managed to receive the EU sanitary code numbers 700. & 949" said the company's Managing Director Ali Asqhar Mahdi.

Mah Protein Company's minus-zero cold-storage capacity is 7,000 tons, & with using expert teams of seafood processing and state-of-the-art equipment, is a pioneer in Iran's seafood industry.

"After the opening of Refah chain stores in 1996, Mah Protein was the first Iranian private sector company that managed to get a great share of the retail domestic market, earning the confidence of Iranian consumers, having more then 1000 retail hypermarket outlets all over country " . He added, mentioning that it was chosen by Iran's Fisheries Organisation's as "Consumers Golden Brand"..

According to Ali Asqhar Mahdi, Mah Protein has taken into account the problems in Iran's decreasing sea-fishing stocks, Mah Protein are keen on supporting and cooperating with fish and shrimp farmers to develop a sustainable aquaculture industry in the country.

Mah Protein has also been the first company to import varieties of commercial fishes which are not available in Iran, that has brought about a rise in the Iran's annual seafood consumption.

The company exports a range of products such as Whiteleg Farm Vannamei Shrimp and Sea-shrimps (Headon, Headless, and Peeled shrimp), Cuttlefish, Ribbonfish, Eel, Sea-caged farmed fish (Barramundi or Asian sea bass & seabream), Rainbow Trout Salmon, all sorts of Persian-Gulf and Oman-Sea fishes as well as dried fish.

Mah Protein imported items include: Norwegian Salmon, Tilapia fillet, Alaska pollock fillet, Narrow-barred Spanish mackerel fillet and Hoki fish..

"The Company now operates in its most modern fully air-conditioned H.A.C.C.P certified plant in Bushehr and Tehran. Obtaining Halal certificate, Mah Protein is one of the outstading exporters of

fish and shrimp to Europe, Middle East, CIS and Russia as well as South East Asia.

"Mah Protein exported 9,000 tons of seafoods worth $16.68 M in 2015, & 8,000 tons worth $22M in 2016 to have the highest amount of exported fish and shrimp from Iran, earning national award for "Top 50 Exporters" certificate by Ministry of Industry, Mine and Trade (MIMT).

Our company has the following ISOs and certificates: HACCP – Halal – EU Sanitary Approval Code : 700 & 949 - Pqh In Food Industry,- China Health Code – Russia Health Code - ISO 10004 – ISO 22000," said Ali Asqhar Mahdi, adding that his company was among the top 50 national and provincial exporters.

Mah Protein final Goal is the satisfaction of its clients, by producing high-quality products based on most rigorous health supervision, with affordable price as well as good services.

Khark Petrochemical Company's CEO Gholamreza Amirshaghaghi Dicusses Export Potentials

Khark Petrochemical Company was initially established under the name of Khark Chemical Corporation in 1969 as a 50-50 joint venture of the National Iranian Oil Company and American Oil Company (AMOCO), mainly to work on recycling associated gas flares from oilfields of the National Iranian Offshore Oil Company and recovering propane, butane, naphtha and Sulphur.

Gholamreza Amirshaghaghi, KPC's CEO, says, "Later in 1992 the construction of Khark methanol plant was started, the plan in fact, was set to help prevent the flaring of surplus gases, produce goods with higher added value, help the country move toward self-sufficiency goals, ease technology transfer, help reduce environmental pollution and create more job opportunities in the region."

"The plant started operating in 1998, with a total investment of $149.5 million in a 24-Hectares area, using Germany's Lurgi technology," he says.

The CEO adds that feed of the complex is sour gas extracted from off shore oil extraction, including heavy hydrocarbons and sulfur componds.

According to the chief, L.P.G recovery plant unit consists of various units including feed gas compression unit, sweetening unit, dehydration unit, absorption and fractionation unit, sulphur recovery unit, granulation & storage unit, demercaptanization unit, recovery Gasoline purification unit, and storage.

Moreover, the plant includes units for utilities like water treatment unit, steam generation unit, power generation unit, and plant & instrument air unit.

The CEO also elaborated on KPC's methanol plant which includes units like feed gas compression, reforming unit, synthesis gas compression unit, crude methanol synthesis unit, distillation unit, and storage.

Amirshaghaghi went on to detail his company's products, Propane, used as raw material for production of olefins and also as fuel., with an annual capacity of 115 000 mt. Butane, with a capacity of 120,000 mt per year, which is used as fuel and also as raw material in production of olefins. Naphtha with 70 000 mt annual capacity, used mostly as fuel and raw material for production of olefins. KPC also is capable of producing 170,000 mt of Sulphur annually. Sulphur is mainly used as a primary material in producing Sulphur compounds, sulfuric acid, fertilizers, electric insulators, pharmaceuticals, tire, gun powder and matches. Methanol, with an annual output of 660,000 mt is the other key product of the KPC, which is the primary material for production of M.T.B.E, acetic acid formaldehyde and industrial solvents.

KPC has two exclusive jetties for exporting its products. The jetties are located on the southeastern corner of the island and consist of a loading platform and eight dolphins. It is linked to the coast via an access bridge and are capable of loading vessels with 5000 to 45000 tons dwt capacity.

The company's CEO noted that the KPC has plans to expand its presence to new international markets, while cementing its position in currently-present markets.

"KPC's products was exported to India, China, the UAE, Pakistan, Turkey, and Kenya from 2015 to 2017," he added.

KPC managed to obtain various certificates including, implementing quality management system (ISO 9001:2008), environmental management (ISO 14001:2004), occupational health and safety assessment (ISO 18001), testing and calibration laboratories ISO/IEC 17025. Other certificates include, movement on the path of organizational excellence using the EFQM model, receiving two-, three-and four-star certificates from the petrochemical industry organizational excellence award in recent years, receiving a Green Industry Certificate

of the Year from the DOE, receiving a Development and Non-Oil Export Boom Award in 2006 from Bushehr Province Non-Oil Export Development Center, Honorable Mention Certificate for an Accident-Free record for Deputy Minister of Oil in petrochemical affairs, receiving a Certificate of Appreciation for the organization's efforts in terms of innovation and scientific and practical achievements in 2008.

Bushehr and Tehran provinces' top exporter of the year.

He also outlined KPC's other measures in recent years, including several projects inside the complex, "These include sulfur granulation unit, mechanized sulfur storage, gasoline recycling project, product mercantilization project (DMD project) utilization of feed gas centrifugal compressors, industrial and sanitary wastewater treatment plant, export dock development project, new gas plant development plan, storage space expansion (making new tanks), and the industrial waste collection plan (LANDFILL).

Year	Total Petrochemical Exports (ton)
2015-16	1,115,759
2016-17	1,141,220
2017-18	1,134,281
2018-19	1,018,920

Mehrdad Nouri Tak Makaron CEO:

Tak Makaron Company Equipped with the Latest Technologies

Mehrdad Nouri, born in 1972, is the CEO of Tak Makaron Company. He has two bachelor's degrees, in industrial design and law, from Islamic Azad University's Tehran branch. He has received his master's in industrial design from the IAU.

He started his carrier in Sedar Pencil Company in 1993, where he served as the executive manager for 14 years. He also worked as the head of Alvand Hospital from 2008 to 2013. Nouri has also been serving as the treasurer and board member of Reyhaneh Charity Fund, which has provided support to thousands of kids, the elderly and paralyzed people. He is also an official court expert and member of IAU's academic board.

His carrier in Tak Makaron began in 2018. What comes after is our interview with him.

Mehrdad Nouri says Tak Makaron was established in 1993, employing efforts of several experts. The company was started its operations in a 12 hectares area using modern technologies and machineries.

The company is one of the few producers in Iran that rely on the raw material produced by the affiliated companies, he says, “These companies are all independent.”

“The Arddaran Group, which is one of Iran’s largest industrial units specialized in producing wheat flour, baking flour, and Semolina; operates to provide the raw material that Tak Makaron need. And the Taksaran Parmis Group is also for distribution of products. The company has more than 1,000 employees and both of these companies are affiliated is with Tak Makaron Holding.”

Managing director of Tak Makaron Company went on to say, spaghetti, Fermi pasta, lasagna, white flour, flour and fortified products, cake powder, snacks and grains are among the products produced by his company.

He added, “The products of this company are produced using the latest technologies; while the machines are developed in Italy, where the pasta is originated from, and Switzerland, which is recognized in accuracy and elegance of technological products... our products meet world standards and are capable of competing with world-class manufacturers in terms of the quality.

Nouri refers to the export of Tak Makaron to other countries, and says noodles and Fermi products are made from wheat and semolina flour. The use of these materials will increase nutritional value of the products and improve their taste and the color. Consequently, our products are welcomed in the global markets for several years.

The company exports its products to Iraq, Afghanistan, Turkmenistan, Kazakhstan, Saudi Arabia, Taiwan, Syria, Cameroon, Somalia, Niger, Nigeria, Jordan, Bahrain, Australia and Canada.

Attending international exhibitions, he says, especially in Dubai, Malaysia, Africa, Turkey, etc., allowed us to exchange views with merchants and participants of exhibitions, and in some cases agreements were signed to help us expand our market.

He emphasized that his company was selected as the leading Iranian exporting company in 2018 by the Ministry of Industries. “Over the past 20 years, we have received more than 220 awards, titles and prizes from various organizations.”

Managing director of Tak Makaron also said: The Company has received certificates of honor and statues from the Consumer Protection and Productivity Authority, the Iranian Standard Organization and Supportive and Regulatory Organizations, during every year of its operation.

He referred to the motto of the country in the current Iranian year, “the product boom” and elaborated on Tak Makaron’s plans for fostering production saying, “Most of the raw materials of the Tak Makaron are made up of wheat, and therefore there will be no problem in terms of supplying raw materials.”

On the other hand, single macaroni will be able to increase its production by increasing its capacity from 450 tons to 600 tons per day by installing new machinery this year.

He acknowledges the key to success in the company is trust and integrity among employees, endless endeavors and hopes for a brighter future.

I am very grateful to the company and its colleagues for the high-level employees. These employees work positively for company. The company’s machines are actively operating throughout the day without interruption, thanks to the efforts of our experienced staff. We are proud that our customers are welcoming and supporting the products of this company as an Iranian quality
product.

According to Nouri, fostering production is the very first step for at the forefront of countering the unfair sanctions of the enemy and hopes for a fruitful year which he believes can be achieved by working close together.

Iran's giant dairy producer Mihan exports to regional countries

Mihan Company's quality products have helped a growth in sales and the expansion of its simple workshop to a semi-industrial workshop and then a company, says its founder Ayoob Paydari.

Production of high-quality new and updated products caused a huge change in Iran's ice cream industry that now stands shoulder to shoulder of the best international ice cream producers in terms of diversity and quality. All this has been realised thanks to the incessant efforts of Ayoob Paydari.

"We have received a lot of national awards in recent years, including Amin al-Zarb award, top mine and industrial unit award, top standard unit, Food and Drug Administration special award and support for production and employment award.

Mihan Food Industries Complex was set up in 1975 in the city of Eslamshahr in Tehran Province by Paydari brothers. Now it's one of the biggest ice cream and dairy producers in Iran, employing 14,000 people. Cheese, butter, milk, cream, yoghurt, dough and all kinds of ice cream and fruit juice are produced by Mihan.

Mihan's ice cream factory is 6.3 hectares, its dairy factory, called Mihan Dairy City, is 37 hectares, its ice cream and fruit juice factory, called Panda Mihan, is 18 hectares. These are among the biggest food industries in Iran.

Mihan's products include varieties of ice cream, pasteurised and sterilised dairy products and fruit juice that come with brand names Mihan, Panda, Fruitland, Highly and Bernard.

Regional countries, that have a large portion of youth population, are the target markets for Mihan products that have high qualities and varieties.

Mihan products are exported to Iraq, Kuwait, Bahrain, the United Arab Emirates (UAE), Afghanistan, Russia and Pakistan.

Bouka holding, Khoshbakht, Poli Pack, Tabiat Sabz and Zarin Mihan, Caspian and Ugur are the company's subsidiaries.

Mihan was chosen as one of the 100 top Iranian brands in the tenth national festival of Iran's industrial champions. It has also acquired four ISOs: ISO 1401, 22000, 9001, 145000.

Here are a number of the awards that Mihan Company has been able to obtain.

- Top national award in March 2019
- Consumer protection award in 2015, 2016
- Amin al-Zarb award in 2018
- Gratitude award for supporting production and employment
- Outstanding industrial ice cream producer in 2015
- Favourite brand golden award in 2015
- Gratitude award from Industries and Mines Ministry in Tehran Province in 2009

Pak Dairy Company has European standards: Managing Director

Pak Dairy Company is Iran's first producer of dairy products. The American-run company was established in 1959 under the name of Pak Milk, producing some 500 kilos of fresh industrialized milk as the basis for dairy products.

"When the company kick started operations with 80-strong staff, bought and developed an ice cream unit and established first milk powder plant, forming a complementary cycle of milk purchase in all seasons," said Pak Dairy Company's Managing Director Ali Reza Sajadi Manizani, mentioning that his factory grew and developed after the 1979 Islamic

Revolution and now it receives up to 700 tons of fresh milk and produces this much of dairy products.

Apart from Tehran, Pak Dairy has set up branches in Sari, Shahr-e Kord, Sanandaj and Yasuj, bringing about a rise in its national product since two years ago. Some 2,000 are employed directly and 12,000 others are working indirectly with the company since its foundation 60 years ago.

“Hygiene and health is very important for Pak Dairy, that’s why it uses the best materials although in some cases it had to go through financial loss. But, the most important part of the company is producing high-quality products that preserve the society’s health,” Mr. Sajadi added.

Pak Diary has 6% of the national market share while 20% of Tehran’s market is dominated by its products, ranking it second or third by scale of pasteurized dairy producers. Pak’s policy is focusing on Tehran’s market.

Pak Dairy’s main exported item is ice cream although several countries, such as Russia, Qatar and Afghanistan have been demanding its dairy products as well. “Pak has become a household name in the world,” Manizani noted.

“Tehran’s market has always welcomed Pak products. That’s why foreigners who arrive in the Iranian capital get to know our brand,” Mr. Sjadi added, explaining that its exports are minimal because of its focus on the national market.

“Being present in other countries and world markets is different. For example, before the 2015 nuclear deal, France had asked that latest world products be produced in Pak Dairy Company, using French technology to be exported to Russia under the Pak brand,” said the company’s managing director.

“Today, Pak products have European standards and can easily compete with its rivals in the continent,” reiterated Sajadi Manizani.

Mr. Khayat, CEO and board member of Arfa Iron and Steel Company explained:

We export to Middle East, Far East and North Africa

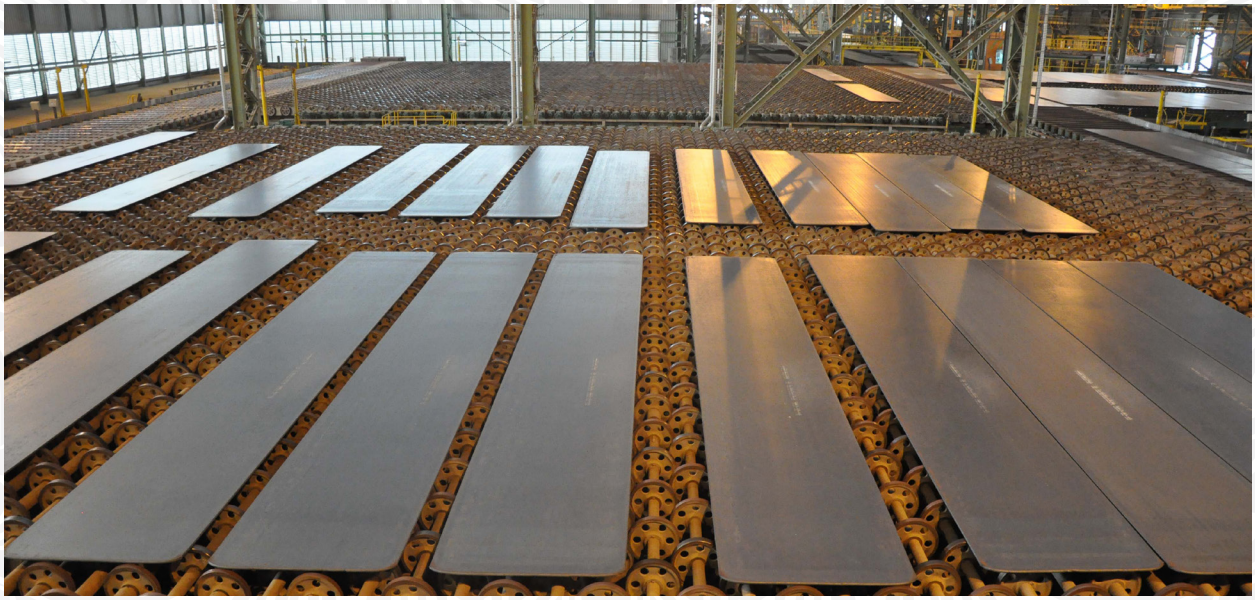
Arfa Iron and Steel Company was established and registered as a joint stock company in March 2005 and according to the decisions of the Extraordinary General Assembly in January 2013, the legal form of the company was changed from a private corporation to a public corporation and six months later, the company entered to the Stock Exchange and admitted to Iran Fara Bourse Company with the symbol “Arfa”.

Arfa Iron and Steel Company has a Direct Reduction Iron plant (DRI plant), steel billet production lines, peripheral water, gas and utilities facility.

Mr. Khayat, CEO and board member of Arfa Iron and Steel Company said “The Direct Reduction Iron unit was commissioned in May 2012 with the aim of producing 800,000 tons of DRI annually.

According to Mr. Khayat explanations, the steel plant was commissioned in June 2013 with the capacity of 800,000 tons of steel billets annually with EAF approach. The company utilizes a Vacuum Degasser (VD) and Vacuum Oxygen Decarburization (VOD) to produce high quality steel.

He continued, “Arfa Iron and Steel Company produces steel billets in accordance with current standards in sections of 130 x 130, 150 x 150 and 200 x 200 mm in length of 6 to 12 meters.



Managing director and board member of Arfa Iron and Steel Company pointed out to export potential and resume of the company and said, “In 2017-18 the company entered to international market for first time and exported 300,000 tons of products within mentioned period. Arfa billets have been exported to Middle East, Far East and North Africa.

Mr. Khayat emphasized that, “Arfa Iron and Steel Company is located in Ardakan, Yazd and is based on a preliminary strategy aimed at providing domestic factories in the center of the country.

But whereas the domestic market conditions have fluctuated and due to the relative slump in domestic steel demand, in spite of our location at the center of the country, we have also implemented an export strategy alongside supplying domestic consumers, and as a result we have been exporting since the beginning of 2016. And in the first year, we exported 300,000 tons of products.

CEO and board member of Arfa Iron and Steel Company said, “The company has all the standards and certificates and besides, based on the latest ranking of the country, Arfa Iron and Steel Company is ranked 84 of the top 100 companies in Iran. It is currently the sixth largest steel company in the country based on production capacity.

"Khuzestan's Oxin Steel Company, the largest producer of high-strength wide steel plates in ME"

Khuzestan's Oxin Steel Company study plan, called "the first and only company in the Middle East," covering 160 hectares of area, was formed in 1992. In 2003, the plant was commissioned and in 2009 the company was put into operation. The main mission of the company is to supply the required plates for the industries of oil, gas, petrochemical and shipbuilding up to Grade X80 with a nominal capacity of 1,050,000 tons of wide steel plate (4.5 meters' width, 24 meters' length and varying thickness according to customer requirements). The raw needed material for this company is a heavyweight slab with weight of 23 tons.

CEO of Khuzestan's Oxin Steel Company introduced the products, explaining, "According to the philosophy of the company; its policies and approach have been evolving over the past years and due to the advanced technology and up-to-date equipment, experienced, educated and young human resources are striving to achieve its core mission.

According to him, Khuzestan's Oxin Steel Company is the largest producer of high-strength wide plates in Iran and the Middle East. Various parts of the factory such as slab preheating furnaces, 10,000-ton mill stand, accelerating cooling equipment's, finishing and heat treatment plants are equipped with the high advanced devices and have the highest level of technical know-how in the world enabling the production of high-strength micro-alloy steel plates, with the best quality and in accordance with international standards.

According to him, the final product of Oxin Steel Company, for applying for various fields such as 56-inch diameter oil and gas pipelines, shipbuilding, industrial and power boilers, pressurized tanks and large

oil and chemical storage tanks, bridges, automotive industry and particular steel plates in special construction structures are varied depending on their mechanical properties and the tensile strength of these plates. Hence it can be increased up to 1200 N/mm after heat treatment processes.

The company's CEO Ebrahimi continues, "Since the company has been able to produce about 550 API plates per annum, it has been pursuing special marketing activities since the year 2013,

and after obtaining the required certification and standards, managed to register in the supplier list (VENDOR LIST) of the clients of national oil, gas and petrochemical industries. Besides, mass production of API products has been seriously tracked since year 2017, with approximately 80,000 tons produced in the first quarter of 2018 and about 42,000 tons in the first quarter of the current year.

According to him, last year Khuzestan's Oxin Steel Company produced 611,516 tons, of which more than 79,000 tons were API-grade products used in oil, gas and petrochemical projects. Other applications of plates of the company is in the manufacturing of pressurized tanks. Last year, more than 26,000 tons of plates have been produced and delivered to the companies producing the tanks. Due to various projects with the companies affiliated to the Oil Ministry, Khuzestan's Oxin Steel Company has obtained a foothold in the production and supply of API products used in sweet environment's services, and recently with the pilot production of API plate of sour service required by the Gurreh - Jask pipeline project; the needed raw materials were provided by Mobarakeh Steel Company; The company is making a contract for mass production of this product portfolio. It is cleared that the market capacity of the API portfolio can be estimated at around 2 million tons over the next two years; an obvious perspective can be drawn on the productivity and profitability of these products. CEO of Khuzestan's Oxin Steel Company says, "Currently, the API plate production program for the year 2019 aim to produce 189,000 tons, taking the underway projects and the assigned contracts. According to the received orders from the oil, gas and petrochemical fields, it can be increased to 300,000 tons.

Ebrahimi pointed to export potential and resume of the company and added, "Given the strategic location, including access to seaports and railways along with access to upstream industries such as Khuzestan Steel and Oxin Steel Company's potentials for the exports of wide steel plates in the region.

He referred to international certifications and standards, and said: "In Khuzestan's Oxin Steel Company since 2011, numerous steps have been taken over the years 2011 to 2013 to establish standard management systems and process management system that can identify, design and document processes. Based on the requirements of ISO 9001: 2008, the establishment of ISO 14001: 2004 environmental management systems and OHSAS 18001: 2007 Occupational Safety and Health Management and the establishment of ISO / TS 29001: 2010 management systems with oil, gas and petrochemical content, From 2013 to 2015, with a customer-centric approach and promotion of certifications programs such as deploying ISO 10001,2,3,4 customer relationship management systems, deploying offshore KR system compliance, deploying ISO-IEC-17025 laboratory quality standards at the lab level, reviewing training process frameworks and obtaining its certification under ISO 10015 and building product compliance systems based on the EU CE-marking system can be mentioned, which can be further added to product certification such as ASTM, API 5L and ISO 29990 to increase customer confidence and approach. This company also manufactures high value-added products in the field of supplying oil, gas and petrochemical sectors. It is worth mentioning that Khuzestan Oxin Steel Company has received ISIRI 3694 mandatory standard mark since 2010.

CEO of Khuzestan's Oxin Steel Company remarked that the company's recommendation plaques, saying, "Oxin Steel Company has participated in three terms of the top 100 companies of IMI100 Institution in the fiscal years 2013, 2014 and 2015, and has been ranked 95th, 100th and 88th respectively. Khuzestan's Oxin Steel Company has also participated in two Nationals Organizational Excellence Awards in 2015 and 2016 aiming at organizational excellence and boosting productivity and has achieved the rank of two and three-star excellence respectively. Being selected as the optimum national productivity unit of Institute of Standards and Industrial Research of Iran in 2014, 2016 and 2017, as well as the high advanced production unit and the best-quality manager of Khuzestan Province's ISIRI from 2013 to 2018 and the best-director of quality control in Iran in 2018 are the other honors of this company.

Iran exports steel products to most destination countries: Sirjan Iranian Steel Company CEO

Ramezan Ghorban Ebrahimi, the CEO of Sirjan Iranian Steel Company (SISCO), refers to his company as the first steel production unit in Iran, covering the complete steel production chain from Iron ore extraction to ingots, and elaborates on iron concentrate and pelletizing units.

“First phase of Sirjan beneficiation Plant with capacity of 2 million tons per annum iron ore concentrate was inaugurated in 2012. Currently, the main portion of produced concentrate is used in our pelletizing plant and the remaining portion is offered through the capital markets,” he says.

Production of first beneficiation plant in the fiscal year that ends in March 20, 2019, has been 1.2 million tons iron ore concentrate.

“The second phase of Sirjan beneficiation Plant was inaugurated in 2016, with a total annual capacity of 2 million tons iron ore concentrate. during the last fiscal year the output of this phase has been 1.285 million tons iron ore concentrate,” Ebrahimi added.

The pelletizing plants, with a total capacity of 2.5 million tons, was also inaugurated in 2016. “The plant’s output was 2.085 million tons during the previous fiscal year of company.”

Ebrahimi added that development of a concentrate regrinding unit, with a total capacity of 2.5 million tons, in Sirjan City was finished in 2018.

DR Plant of Bardsir Steel Complex produces sponge

iron(DRI) from pellets by MIDREX technology. The plant production capacity is expected to be 1 million tones DRI per year. Our pelletizing plant provides 1.5 million tons of pellet per year, as the feed of DR Plant.

The DR Plant is the first of its kind in Kerman Province of Iran, was inaugurated in 2014. DRI production of DR Plant has been 835.000 tons in the last Iranian fiscal year.

Bardsir Steel Complex has steelmaking plant with Electric Arc Furnace(EAF) for melting the DRI . The melted DRI will be refined in a ladle furnace (LF). Then it will be transformed to steel ingots by a continuous casting
machine.

According to Ebrahimi, SISCO, using the mines Nos. 2, 4, and 6 in Gol Gohar Industrial Area, has managed to provide the domestic markets with various products namely concentrate, pellet, steel ingot.

Elaborating on Iran's potentials for exporting steel products Ebrahimi says, "Iran is exporting steel products to several destination countries… The largest consumers of Iranian steel products are located in MENA and South Eastern Asia."

"SISCO's products are also welcomed in foreign markets," he says, "SICSO has exported iron ore pellet to China; DRI to Persian Gulf states, Europe, and North Africa; and steel ingots to Persian Gulf states, Thailand, Indonesia, Egypt," he added.

Sirjan Iranian Steel Co. (SISCO) is a private company established in 2009, and reached into operation in 2011. It has exported a wide range of products to foreign markets, including: 1.2 million tons of concentrate to China; 215 thousand tons of pellet to China, 186 thousand tons of sponge iron to Persian Gulf states and Europe; 4,700 tons of steel ingot to South East Asia.

Gholamreza Rasoulian CEO of Tabarestan Steel Foundry

We meet the needs of industries and mines for their most complicated steel casting components

Tabarestan Steel Foundry was registered in 1983, however the production started only in 1986.

At that time, only two casting companies were active in Iran. One was located inside the Esfahan Steel Company, which only produced parts required by its parent company and the other one was Machine Sazi Arak, which focused on some specific products. Therefore, the need for a foundry that was able to produce the components and parts required by different industries was strongly felt. The initial capital requirement was 300 million Rials. Approximately 50% of it was contributed by the 14 shareholders through equity and balance was raised by bank loans. We started the work with around 30 people. The plant was established on a land between Ghaemshahr and Sari with a total area of 5,000 square meters, of which 1,000 square meters were halls.

Currently, Tabarestan Steel Foundry has 70,000 meters of land and a 8,000-meter of production halls.

The initial production capacity of 200 tons is now 10,000 tons per year. Factory No. 2 was built in Sari, as part of our expansion project. The subsidiary companies were added to Tabarestan Steel Foundry as part of our vertical expansion.

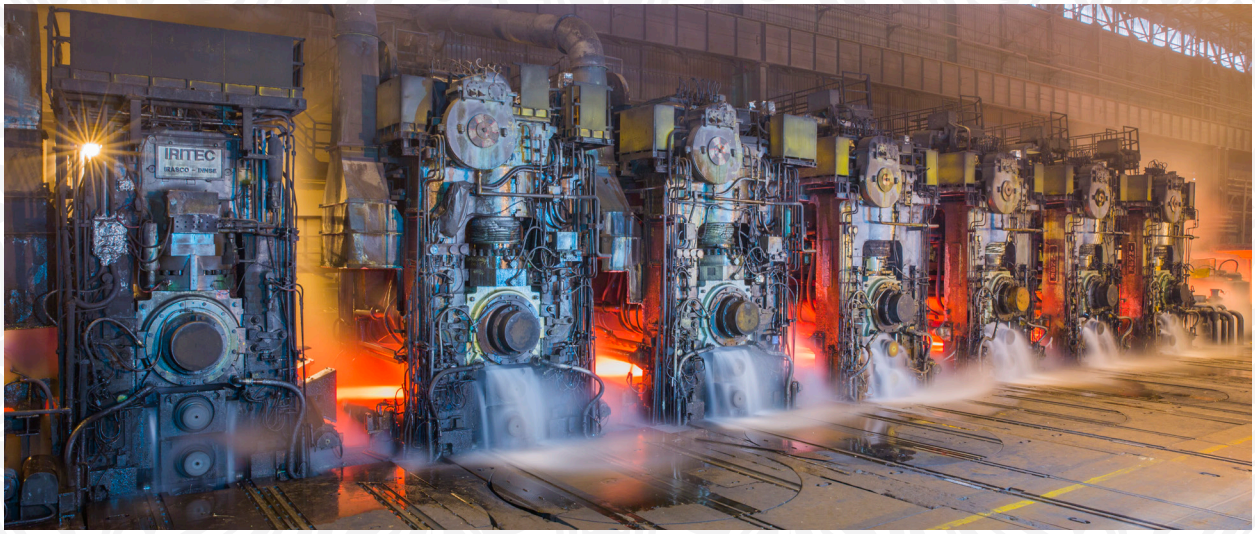
Tabarestan Steel Foundry was registered as the third privately owned steel casting plant in Iran, and now more than 20

factories are operating in the foundry industry.

Rasoulian refers to the company's products and says: Our production is based on customer needs and orders. The part or its drawing is taken from the client and after modeling, molding, casting, heat treatment and machining, the final product is delivered to the customer.

He adds: we produce parts for copper and iron ore mines, quarries, cement factories, steel and pelletizing complexes plus aluminum, rail, oil and petrochemical industries.

According to Rasoulian, Tabarestan Steel Foundry does not mass produce a product. We produce pieces from several hundred grams to 10 tons according to customers' orders.



According to the managing director of Tabarestan Steel Foundry, at the moment the company is developing its exports to the countries of Iraq and Russia. Focusing on international markets became our main sales strategy since1992. Access to international markets has two main advantages: firstly, access to a bigger market and potential to sell higher quantities, secondly to compete with world player, we need to constantly update our technology and know-how.

Rasoulian clarified: It took years for our export sales strategy to give results. After 3 years of marketing, we signed a contract with a French mining equipment manufacturer in 1995. Their first order was only 34 tons of parts. We did manage to build on this initial sale and by 2009, we were exporting approximately 3,500 tons per year with the revenue (from export) of $8 million to $10 million. Unfortunately, after 2009, our exports suddenly dropped to nearly zero due to imposed sanctions by EU and UN.

The CEO of Tabarestan Steel Foundry further explained the company's achievement in acquiring various certification, including ISO 9000, ISO 14000, plus receiving the title of the country's top exporter and a provincial leading
exporter.

Rasoulian said one of the major accomplishments of the company has always been the production of parts for the first time in Iran .These parts such as slurry pumps, pelletizing and paper milling parts and mill liners have been produced for various local industries. The most recent example is the production of the central piece of railroad switcher which has a critical role in railways.

Mobarakeh steel company: a big firm with great honors and achievement

Development of mining industry is the most effective solution to have a dynamic economy in Iran as the country has vast mining capacities and the steel industry is growing by day.

That's why according to the agenda, Mobarakeh Steel Group is set to produce more than 8.5m tons of raw steel, that is, Esfahan's Mobarakeh Steel Company will produce 5.6m tons, Hormozgan Steel Company will have a production of 1.5m tons and Saba Steel Complex will take care of the remaining 1.420,000 tons.

"Mobarakeh Steel Company will produce 5.1m tons and Saba Steel Complex is set to manufacture 1.4m tons of hot-rolled steel coil. Also, we have a plan to produce 1.586.000 tons of raw coil.

Periodic reports about Iran's steel industry show that back in 1977, the country's steel mills produced some 700,000 tons. However, after 1993 when Mobarakeh Steel Company started, the national production grew a lot until in 2001 6.6m tons of steel was produced and in 2018, iran's steel production reached 25 million tons.

"over these years, Mobarakeh Steel Company produced about 50% of the overall national production alone. Back in 1977, Iran was ranked 35 in steel production while in 2018, the country moved up to the tenth spot,"

Planned growth of production capacity in Hormozgan Steel Company and Sefid- Dasht Steel Complex will lead to increase in capacity of mobarakeh steel group up to 12.8m tone until 2020 so the company can have the line share of the country's market.

"All personnel at Mobarakeh Steel Company are now one mind and soul to produce the equipment ourselves using company's technical know-how, cooperation with knowledge-based companies, universities and national manufacturers and 2,800 manufacturers are cooperating with his company,

providing the necessary production and support lines.

The project has already saved more than $400m supplying such equipment locally.

“Considering Iran’s mining capacity and growing steel industry’s ability to create jobs, we can take strides in decreasing the country’s dependency on oil by activating this sector’s potentials,”

Mobarakeh Steel Company is employing more than 25,000 people directly in Isfahan, Hormozgan Chaharmahal-Bakhtiari, and Razavi Khorasan provinces and created indirect jobs for some 325,000 all around the country in steel industry.

“After the company expands in near future in the country, some 2,000 more people will be employed directly will join Mobarakeh Steel Group’s big family.

Mobarakeh Steel Company used some 16.6m3 of water to produce some 2.4m tons of steel in 1994. In 2019 Mobarakeh Steel Company’s production volume has risen to 6.3m tons of steel, witnessing more of 100% rise.

The company has invested in the construction of an urban sewage system and reused the company’s industrial water sewage as well as the sewage from the nearby cities, saving 84%, that is, it is using the same amount of water used in 1994 for two-fold production in 2018

Mobarakeh Steel Company’s actions to prevent the flow of industrial and urban sewage from entering the environment, especially the emblematic Zayandeh-rood River, have caused a reduction in the society’s health costs.

Here is a list of the steel company’s honorary diplomas, awards and certificates:

#10 among world steel mills according to World Steel Dynamic.

Award Winner Gold in EFQM’s evaluation.

#1 in base metals and #2 in Value-Added Index at IMI100/

Year’s Outstanding Organization.

Highest grade in iranian Organizational Excellence Award.

Provincial and national standard unit.

Quality unit and provincial and national standard as chosen by Isfahan Province’s Standard Organization.

. #11 in MAKE Awards, standing next to Samsung, Toyota... for the first time in the Middle East

Award European green society for environmental measures.

. Golden award for supporting the Consumer Rights

. All the honors and successes that have been achieved so far are the result of the teamwork between the management and personnel.

Saba Steel Company has earned trust of its international clients: Managing Director

The groundwork for the establishment of Saba Steel Company was laid in 2008 in Persian Gulf Mining and Metal Industries Special Economic Zone (PGMISEZ) and later inaugurated by President Hassan Rouhani.

“An Indian company was in charge of it until 2008. After the firm left Iran, Civil Servants Pension Fund bought its shares. Currently, Saba Steel Company’s phase one produces more than 1.5 million tons of Hot Briquette Iron (HBI) per year,” said company’s Managing Director Morteza Yazd Khasti.

“Saba Steel Company is the latest HIB producer in the Middle East and the World. In total, 17 companies in Malaysia, India, Venezuela, Libya, Russia, Qatar, Iran and Oman produce hot briquette iron,” he added.

HIB or sponge iron is produced in furnaces and steel companies. Raw steel in the form of slab or ingots is produced to be used in construction raw materials as well as iron bar and iron sheet. Rolling

mills turn them into iron sheets.

“Saba Steel Company produces sponge iron briquette that is made from iron ore pellets,” mentioned Yazd Khasti.

HIB looks like brick and has all the sponge iron uses while sponge iron catches fire if combined with oxygen, that is, should always be taken care of.

“This characteristic will incur huge transport costs because nitrogen should be injected into it. The advantage of HIB is that it doesn’t catch fire by itself and its transport is easy, meaning it can be easily stockpiled in open air areas and closed spaces and also be transported very easily by sea. Due to shortage of iron scrap, HIB can be replaced very easily,” according to Saba Steel Company’s managing director.

Saba Steel Company was set up in the southern port city of Bandar Abbas on the shores of Persian Gulf because steel companies are established near mines or seas. This industry needs lots of water so, being situated close to the sea meets one of its needs.

“Being in a special economic zone gives us all the necessary exemptions. And as it is next to the sea, obtaining raw materials and exporting our products would be easier,” Yazd Khasti noted.

He explained that the Indian company only constructed the necessary areas. The company’s current capital is estimated to be more than $83m.

“20 people work to produce one ton of products and now up to 600 people are working directly in the company,” Saba Steel managing director said.

Saba Steel Company’s development plan foresees a considerable development and expansion. “However, production volume depends on the current economic situation which has been unstable recently,” he noted.

Saba Steel Company exports 95% of its products to the Persian Gulf states and 18 Asian and European countries.

“There are 17 sponge iron producers in Iran that use their own production and a small number of them sell their products to other companie,” according to Yazd Khasti.

He reiterates that exporting to European countries is very hard due to their environmental standards. “However, Saba Seel Company has been able to earn the trust of its international clients by observing environmental standards,” he said.

“Previously, Iranian trading firms bought our products to export them while we focused on improving the quality and increasing the production,” Yazd Khasti added.

Esfahan Steel Company: The Pioneer of Industrial and Structural Steel Production

Esfahan Steel Company (hereinafter referred to as ESCO), popularly known as the first steel manufacture of Iran, will celebrate its 52nd establishment anniversary on March 2020. With Half a Century's Experience, ESCO is famed as the mother of Iran's steel industry and since the Iranian industrial sector was not well developed at the time of ESCO's establishment, this company became a source of developing craftsmen and managers, who have now significant roles in all reputed industrial sectors of Iran.

Currently, this large industrial complex produces 72% of the country's I-beams, 8% of its round bars, and 9% of crude steel. Since its establishment, more than 72 million tons of finished products have been produced in ESCO Which has made great contribution to construction projects in Iran.

Regarding the position of ESCO in Iran's steel industry, an interview was conducted with Mr. Yazdizadeh, Managing Director of ESCO, that is as follows:

"At the present time, ESCO's main concern is lack of enough raw materials which has led to an increase in the unexploited capacity of the plant. However, this year's plan is producing 3,050,000 tons of crude steel which is proceeding well, despite current numerous problems. Accordingly, ESCO has set some remarkable records in monthly and daily production rate during the first three months of 2019", said Mansour Yazdizadeh, Referring to the 3,600,000 tons annual production capacity of ESCO

Having a green area 80 times higher than the international standards

"During the past years ESCO has been undertaking major social responsibilities both at national and regional scale, in terms of human resource attraction and training, also construction projects such as hospitals, stadiums, and cinemas. Making an investment of 4000 billion Rials on environmental projects and creation of the country's largest hand-planted forest with area of 16,500 hectares is one of the major social responsibilities fulfilled by ESCO", added Mansour Yazdizadeh.

According to Yazdizadeh , ESCO's total production area is 780 hectares, which requires 200 hectares of green environment according to the international standard, while in ESCO it is 80 times more than the standard".

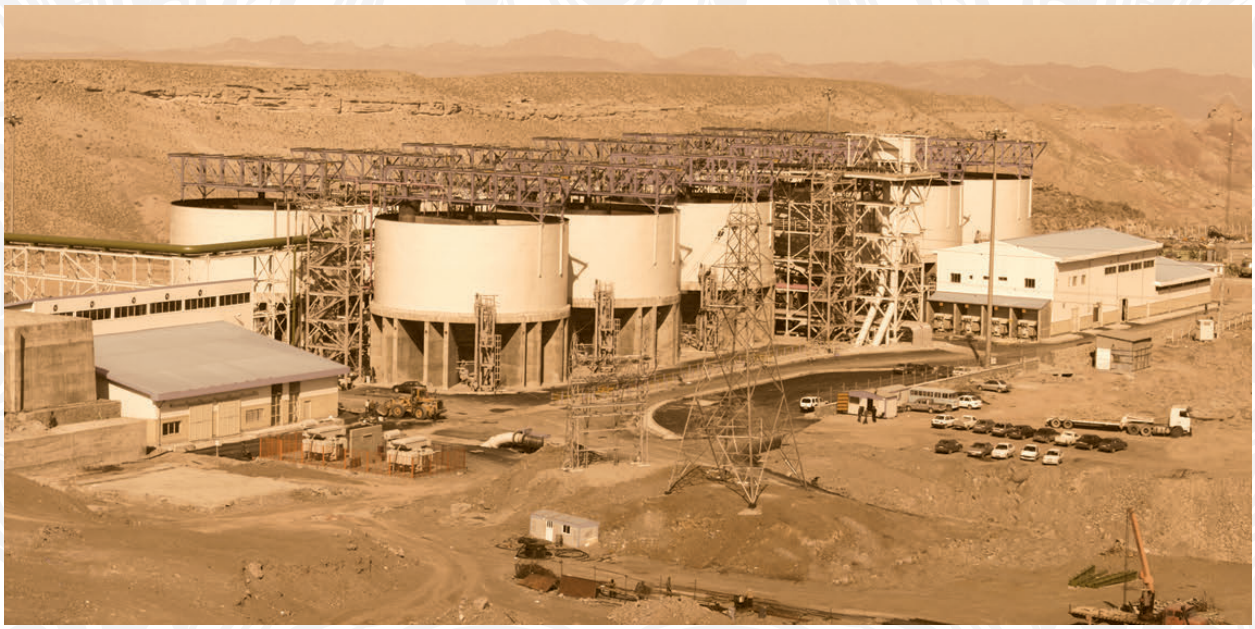
ESCO's managing director clarified: "ESCO was not only the founder of Iran's steel industry but also laid the foundation of many other industries in the country by training and development of skilled professionals, which paved the way for other popular companies such as Mobarakeh Steel Company(MSC), Iran National Steel Industrial Group (INSIG), Khorasan Steel Company, Khuzestan Steel Company(KSC), helping them to grow and enter the market using our company's valuable experiences".

"Some of ESCO's development projects to mention are the company's renovation project, also the establishment of two blast furnaces, two rolling mills, and the steel casting station. One of these casting stations with a capacity of one million and two hundred thousand (1,200,000) tons with the world's state-of-the-art technology has been established two years ago", he added.

"It used to be the public opinion that ESCO only produces Structural Steels, so that the round bars available in the market were known as: "ESCO's Re-bars". Milad Tower is an example of using our company's steel in remarkable construction projects. About 2,000 tons of round bars, sizes 28 and 32, were used for the foundation of this structure", Yazdizadeh mentioned referring to the important role of ESCO in the supply of required materials for construction projects.

"However, by implementing different projects, ESCO has succeeded to produce industrial products as well. Desulfurization and vacuum degassing systems are also applied for improving the quality of industrial steel and increasing the steel purity. Besides, ESCO has always been a pioneer in terms of product variety by producing industrial and structural steel products." he said.

Yazdizadeh added, "One of ESCO's important movements in terms of products variety is the production of different H-beams, so that last year H300, which is considered as a safe, standard and cost-effective alternative for plate girders, was produced for the first time in Iran".



Rail production is also the company's cream of the crop and includes the production of UIC60, UIC54, U33 and S49 which that are used in high-speed and slow–speed lines as well as in metro lines.

"So far, Based on the concluded contract, 2500 tons of rails have been delivered to IRI's Railway Organization and an additional 40,000 tons of rails has been planned to be delivered by the end of this year".

Yazdizadeh enumerated the premium quality and peculiar features of ESCO's steel products as one of the competitive advantages of the company and considered great quality of the products

the reason why ESCO is the only Iranian company certified with CARES certification.
"This certification has been issued for the export of steel products to UK under BS standard. ESCO has exported its D- bars to the UK, under this certification", he noted.
ESCO has also obtained environmental certificates such as ISO 14001, ISO 10015 as well as ISO 9001 quality management certificate.
"The company is capable of exporting 50% of its products which is possible due to having credible international certificates, among these include, standard sign permit for parallel flange beams, standard sign permit for angles and hot-rolled steel round bars, also laboratory accreditation certificates", said Yazdizadeh.
"ESCO is a pioneer in technical know-how of parts/components manufacturing. There are several workshops that meet 85% of the factory's requirements with only 10% being supplied by the domestic manufacturers. It is worth mentioning that about 5% of the imported products including ball bearings, special motors, gear boxes and pumps are supplied from international market due to the need to comply with certain international standards for such items", Yazdizadeh added.
Considering the two types of coal, thermal coal and coking coal. The coal consumed in ESCO is of coking type that should have certain features so that it can be used in coke oven battery, having the required standards and sufficient resistance to high temperatures.
From the very beginning of ESCO's establishment, about 30-35% of ESCO's required coking coal has been supplied from abroad to be mixed with domestic coking coals so as to attain the desirable standards and resistance.
"Presently, researches on the coal concentration project is being conducted that will assist the possibility of supplying the required coking coal completely from local mines", according to ESCO's managing director.
He also enumerated visions and strategies of ESCO as follows:
Becoming a pioneer in the production of long steel products in Western Asia with superior quality, profit making and being known as a reliable brand in both domestic and international markets;
Fulfilling a key role in the social and financial promotion of the country by facilitating the development of constructional and industrial infrastructures;
Ranking among the first 5 top regional steel making plants in terms of quality and profitability by relying on localization technology.
As far as the environmental activities are concerned, Mr. Yazdizdeh noted "we are doing our best to reach the desired standards, though our objectives are not completely attained in this regard. A special standard is being targeted for which a mutual contract has been concluded with a European company. With regard to water, as a critical and limited resource in Esfahan, the approach taken by ESCO is use of wastewater. In this regard, appropriate contracts have been exchanged with the neighboring cities based on which 90% of the company's water consumption will be supplied from wastewater during the 2-4 forthcoming years".
"We are the only company that has had its own power plant. The coal being charged into the coke oven battery turns into coke and the required gas of power plant is supplied by the mixture obtained from the emitted from the coke oven battery together with blast furnace gas (BFG). A combination of CH4 gas with a 1:10 ratio is also used. This means ESCO does not receive any subsidies from the government. Besides, the quantity of gas supplied from the national gas network is very trivial. furthermore, ESCO generates 200 megawatts of electricity. In some cases, the excess electricity generated by ESCO is delivered to the national grid", Yazdizadeh mentioned.
According to projections, Iran will produce more than 26 million tons of steel, from which the domestic market accounts for 16 million tons; hence, the excess products should be exported. This year, ESCO is among the top national exporters and we hope this upward trend can be continued", according to the ESCO's Managing Director.
Referring to exports targets, Mr. Yazdizadeh also asserted that, "a large portion of the products are being exported to Persian Gulf countries, Iraq, Afghanistan, Eastern Asia, Northern Africa and parts of Europe".
ESCO as the Pioneer of Iran's Industrial Sector
Within the protocol of technical and financial cooperation between the former Soviet Union and Iran, the construction of ESCO was finalized based on which an agreement was signed, later approved by Iran's parliament in January 13, 1966. One of the principles of this agreement was the cooperation of Soviet Union in the establishment of ESCO in Iran.
Under this agreement, Iran's National Steel Company concluded a contract with Russia's Tyazhprom export Company for the preparation of design, supply of equipment required by the factory as well as mobilization of iron ore, coal and limestone mines.
Considering the insufficient financial resources and shortage of raw materials, especially coking coal storage, Soviet experts determined an annual production capacity of 550,000 ton for the first year. Later, steel-making and rolling plants, with a capacity of 600,000 ton, were added to the factory.
Following 1979 Islamic Revolution, the ascending development trend of performance and production of ESCO reached its peak. Currently, with a capacity of 4 million ton pig-iron, 3,600,000 tons of steel and 3,000,000 tons of different steel sections, the company is doing well.
At some points, ESCO's Rolling Mill plant attained 2,800,000 tons of rolling products by importing billets, meanwhile in terms of steel and pig iron, it attained the production record of 2,700,000 tons", Mr. Yazdizadeh added as the last point.

Canymes Company has a lot of international partners: Managing Director

Canymes Engineering and Technical Services Company in Mines and Industries has valuable experiences in management of mining and metallurgical projects by using an experienced team of managers and experts that have long served in management, designing, engineering, trade and implementation of projects.

It also gives consultation and proposes proper solutions to improve, develop and realize industrial projects by using its 17 years of experience.

Canymes comes from a background of cooperation with famous international companies, use of experienced engineering teams and effective Iranian companies' services.

The company is currently one of the most powerful Engineering, Procurement and Construction (EPC) in copper and steel sectors that has had successful experiences in its projects, relying on its own human resources in engineering, trade and control of projects.

"Canymes was registered in 2000 at the Company Registration Office. It was established that same year by the Civil Servants Pension Fund of National Iranian Copper Industries with $1.219 capital (according to the exchange rate in 2000)," says Mohsen Alamir, Managing Director of Canymes Engineering and Technical

Services Company in Mines and Industries.

"The company was set up to make the industrial parts that are used by National Iranian Copper Industries. As of 2004 and as the company grew, it forayed into the EPC and Management Contracting

(MC) services," he adds.

"We are a leading general contractor in the field of mine and metal specifically in copper and industry sectors. Now with a capital of $5m, we have turned into a powerful company that has a regional view by using modern solutions," according to Alamir.

Canymes Engineering and Technical Services Company in Mines and Industries employs 400 experts directly and up to 2.500 others are also cooperating with the company. It's working directly with copper and steel industries in following projects:

Ahar Lime Company (under construction)

Heap leaching at Sungun mine (hydrometallurgy)

Development of Khatoon Abad Smelter Expansion Project

Direct Reduction plant at Jahan Foolad (MC)

Jahan Foolad smelter facility (MC)

Navard Rolling Mill Project in Bardsir, Kerman

Sarcheshmeh Nickel plant project

Construction and implementation of paste thickening plant at Sarcheshmeh copper mine

Constructing power grids at Sarcheshmeh copper

"We have been obtaining various projects in the region by participating in auctions in the past several years," Alamir mentions.

Canymes Company has many partners in the world and uses the technology of big international companies as not all the necessary facilities can be constructed in Iran and should be imported, according to its managing director.

Canymes Engineering and Technical Services Company in Mines and Industries' mission is to earn the trust of its clients. Here is what it does to achieve this goal:

Identifying the client's needs in designing and implementing industrial, mining, oil, gas and petrochemical sectors

Meeting the client's needs through technical, engineering, management, implementation of industrial and mining, oil, gas and petrochemical projects, high-quality construction, installation and repair of industrial parts

Improving quantity and quality of projects, offered services and parts to increase the client's satisfaction

Improving productivity, ability and satisfaction of the human resources and increasing their technical know-how through effective education

Improving work processes to help better the effectiveness of the quality management system

Managing the supply chain of equipment and industrial parts through quantitative and qualitative improvement of management of vendors, producers, repairmen and contractors

Use of modern management, hardware and software tools and technologies

Here are a number of the certificates of Canymes Company

Certificate of contractor qualification from Planning and Budget Organization of Iran

Grade 1 in industry and mine

Grade 5 in facilities and equipment

Grade 5 in roads and transport

Grade 2 in construction

Qualification of implementing industrial projects through designing and construction

Grade 2 in industry and mine

Qualification in consultation services

Grade 1 in mineral processing

Grade 2 in base metals industry (rolling, smelting and casting) and machines

Contractor qualification certificate

"As achieving the above-mentioned goals requires a dynamic and effective management system, Canymes has obtained ISO 9001 and 2008, hoping that it can help contribute to the Iranian economy under the sanctions," Alamir explains.

Valad Company;

experts in curtain wall systems

Valad Company started operations some 25 years ago fabricating doors, windows and curtain walls. The company is mostly especializad in high-standard curtain wall systems for high-rise bulidings.

“Valad Company founded in 1982 in the field of fabrication of doors, windows and curtain walls,” said the company’s founder Mohammad Hossein Farivar.

“Our company operated in the United Arab Emirates (UAE) since 2004 until 2010 working with European system suppliers and consultants by realising projects in United Arab Emirates, Africa and Central Asia,” he added.

Valad turned its eyes back to the Iranian market in 2010. “We bought an aluminium profile extrusion company in 2017, focusing on production of aluminium doors and windows,as well as curtain wall systems” mentioned Farivar.

There is huge gap between the quality of doors, windows and curtain wall systems in the region and those of other advanced countries like the European ones, according to Farivar. “Our mission is to narrow this gap,” he added.

“European companies started producing aluminum systems much sooner than us so they are more experienced in this field. If we can export our products, we need to improve our quality and so our financial capacities and base on that, our regional and international experiences will increase,” Valad Company’s managing director mentioned.

“The raw material for the production of aluminium profiles (billets) comes from the combination of pure aluminium and other elements. There are companies in Iran that produce billets and we use them. Much of our billets is produced in Iran Aluminium Company (IRALCO)” he added.

Farivar downplayed the US sanctions on Iran, saying that Russia and China also produce this material and sell it to Iran easily. However, he stressed that the market has been volatile because of the sanctions.

“Up to 70 peoples are working in Valad Company. At first, we produced some 400 tons that has risen to 1,000 tons of aluminium profile now,” according to Farivar.

Valad Company is competing against some 8 Iranian rivals that produce aluminium profile. “Although their production is much bigger than ours, we are faring much better in quality,” he stressed.

The company’s managing director reiterated that he doesn’t have exact statistics about the internal market’s needs, adding that Valad Company meets some 6% of the internal needs.

Farivar expressed regret that much of the aluminum profiles used in Iran come from Turkey “because the Iranians believe foreign brands are better”.

Valad Company exports to a limited number of regional countries,

such as Iraq. “Although we have potential customers in the United Arab Emirates (UAE) and Qatar, we can’t do much because our banks can’t open or accept letter of Credit (LCs) due to sanctions,” he noted.

There are many bauxite mines in northeastern Iran, that is, there are huge production capacities in the country.

Valad has obtained Iran’s standard and Product Certification from the Emirati Al Futtaim Group and is seeking to get another Product Certification from the German IFT Rosenheim Institute that is accredited by all the countries in the world.

Farivar also seeks to expand the company and its production capacity.

“Aluminium doors, windows and curtain wall systems aren’t complex structures but putting these simple elements together for a good performance needs overlapping knowledge and experience,” according to Valad Company’s managing director.

Zarin Iran Porcelain Industries, most modern porcelain manufacturing unit in country

Eng. Abbas Ali Ghassai, founder of the country's largest and the most modern porcelain manufacturing unit with a long history in Porcelain and Ceramics, explained the process of starting and growing this business as follows:

" Zarin Iran Porcelain Industries Co. obtained it's license in1974. Although due to outbreak of the Islamic Revolution and the imposed war on IRAN, the first production phase was not launched before 1988 with a yearly capacity of 1000 tons.

Zarin expanded and increased its production in several major development phases to reach the current remarkable capacity of 13000 tons per year with over 1500 skilled manpower on a land area of 150,000 Square meters, which put us among the largest and most important porcelain manufacturing factories in the world.

This development process still goes on and we are currently implementing the final phase of our development by installation of the most modern machinery in porcelain industries".

Chaiman of IRAN Porcelain Association, pointed out that porcelain production is a sophisticated job and has a very time and labor consuming production process and the average time to make a piece of porcelain for instance, is about 70 days".

He added on:

"Zarin Iran Porcelain Industries produces a wide range of ultra-fine hard porcelain known as FDC (Fine Diamond China) with ultimate ceramic features and firing temperature of 1400 °C.

Zarin Iran Porcelain industries holds the biggest market share in the domestic market and exports a considerable portion of its products to more than 25 major countries around the globe, and because of that has been selected as the exemplary exporter of the country and was awarded and praised by IRAN presidents for several times in the past".

Speaking about the starting point of his career, Eng. Ghassai said:

"After graduating from Alborz Boarding School, I traveled to Germany to study a family-run mission for expanding and upgrading my ancestral traditional business. I completed my higher education in ceramic engineering, which at that time was not possible in Iranian universities, and returned to Iran in 1971. Since then I have been spending all my efforts to develop and raise the quantity and quality of my over a century old family business."

Mentioning the history of Ghassai's family he continued;

"The family name "Ghassai" means potter " and our profession history is estimated to go back to about 135 years ago (dated back to 1881) which shows the great heritage of Zarin Industries" he added.

Mr. Ghassai highlighted consumer satisfaction in direct relation with product quality and said: "We created "Zarin Home" retail chain stores to have direct connections with the final consumers and get immediate feedback on our products.

After 10 years since we established Zarin Home brand, we experienced the drastic positive effect on quality of products by minimizing the gap between production and consumption."

Saeed Kalafchi, the CEO and the board member of Noritazeh Glass Company:

70 years of industry experience of its founder guarantees Noritazeh

The CEO and board member of Noritazeh Glass Company, underlinesthe fact that the company has been in operation of glassware production since 1999, and that the activities of the company relates to the houseware industry as well as the glass industry. The production capacity of this industrial unit is 42,000 tons per year with twelve production lines and two furnaces. Noritazeh prides itself with being the highest quality producer in Iran.

Saeed Kalafchi adds, “Our products are offeredunder three major brands of Noritazeh, Sakura and Lisa Mori, each witha diverse range.”

The company is 100% privately owned, and its 70 years of work experience of the company’s founder in the glass and crystal business has been the backbone of launching a successful operation.

He continued, “Initially, the founders of the companywere basedin Dubai and ran a successful trading operation working closely with reputable global brandssuch as Soga Japan, and Luminarcof France.”

In 1996, Noritazeh was established in Iran, and in the year 1997, the owners invested their capital and experience from Dubai to Iran in order to provide employment opportunities for Iranian youth and take advantage of the large local market.

This led to the employment of more than 1,200 people, which would have been more than 5,000 people today if continued government and financial support for the development

plans were realized.

The first phase of the plant was launched under the license of Soga Japan. In time, the company gained valuable experience and technical know-how, and managed to localize the required technology and productivity to reduce dependence on foreign entities.

Continuing its developments, Noritazeh initiated the production of crystalline for the first time in Iran via the acquisition of the historic Lisa Mori brand from Austria. Crystalline, is the new generation of crystal-ware that uses potassium and barium in its composition instead of lead, which is a healthier and more economic option making it more competitive than lead crystal and affordable to the mass market.

Saeed Kalafchi underlined that the founders have invested $12 million in the first phase of the plant, and received $27 million in financing for the second phase. Alongside this financing, the foundershave invested a further $27 million of their own capital in the second phase, making the total investmentin the range of $70 million. Therefore the capital structure of the company is 65% by the founders and 35% by financing.

The company has been financing its development from its own profits and sources all its raw materials from local suppliers. However, its technical know-howoriginates from Japan and Turkey andmost of the machinery and equipment's have come from Germany and Italy.

Most of the raw material is silica sand, which is abundantly found in Iran. Other raw materials are sodium carbonate, which is also mass-produced locally. Howeverin order to maintain high quality packaging for the high quality production, the company mainly uses Korean cardboard which has better quality than local paper.

Saeed Kalafchiemphasized one of the most important goals of company is exports, and added thatalthough imports from low quality sources were before the main focus of debate by local producers, right now the focus of all major producers is export. Noritazehhas exported to 55 countries to date and is right now active in more than 35 countries, which amounts to 50% of its production. The goal is to raise this figure to 75% of production.

Noritazeh has received various domestic standard certificates, ISO standards and other industry certifications and has also earned numerous rewards for its performance from the industry trustees, such as the Glass Industry Association,

the Industrial Unit of the Year by the Ministry of Industry, Mine and Trade as well asseveral rewards from the Organization of Small Industries and Industrial Zones affiliated to the Ministry of Industry. In 2007, the Export Association selected the company as the exporter of the year for the first time.

Noritazeh has also been active in domestic and international exhibitions both in the glass and housewares industries, by participating in notable international exhibitions such as Ambiente Frankfurt and Glasstec Dusseldorf every year for the past 15 years.

Pars Olang seeks to export engineering service: CEO

Pars Olang Engineering Consultant Company started off with an office in Olang Mining Company. Now the company enjoys 20 years of experience in geology, exploration, drilling supervision and development studies.

“Our company has supervised and studied 25% of all the mine drilling in the country,” said Ali Almasi, Managing Director of Pars Olang Engineering Consultant Company.

“This means that out of the four million registered mine drilling in the history of Iran’s mining, Pars Olang has surpassed one million,” he explained.

Almasi, a graduate of geology at the University of Tehran, added that his company specialized in mine exploration studies, open-pit and underground mines studies, drilling supervision, excavation and geotechnical operations.

Pars Olang has also helped in stability consolidation and rock fall prevention in various mines such as Sungun copper mine, Chahar Gonbad mine, according to Almasi, who worked 12 years for the Central Alborz coal mines.

Apart from these, the company had a successful cooperation with Iran Railway Company client in Khorram Abad, Bandar Abbas and Mianeh railroads as well as construction of a part of Chalus road with Ministry of Roads and Urban Development, mentioned Pars Olang managing director, who worked as a mine planner for National Iranian Steel Company.

“Pars Olang Consultant Company has made a household name for itself, employing 170 personnel in four branches in Tehran, Kerman, Azarbaijan and Sistan and Baluchestan,” added Almasi, who was head of Geological Survey & Mineral Explorations of Iran (GSI).

He noted that almost all of our services are handled by Iranian experts but also benefited from international corporations.

Almasi, the former deputy of geology and mineral exploration affairs at the former Ministry of Industries and Mines, stressed that his company has had good corporation with National Iranian Copper Organisation in supervision of drilling, exploration and other operations in most important Iranian mines such as Sungun, Sarcheshmeh, Meiduk and Muteh mines.

He believes that Iran enjoys high capability of exporting of technical and engineering services along with exporting of oil and minerals.

Pars Olang is negotiating with several companies in Iraq, Afghanistan and Oman about running mutual benefit projects.

ParsOlang is supporting a startup, called Tehran Expos, that is

an online exhibition platform with additional services for marketing and advertising. Tehran Expos offers supply chain marketing in industry sector and is also supported by Iran Mine House (IMH) and Iranian National Committee World Mining Congress (INCWMC).

Ali Almasi held other public and private-sector positions such as vice presidency of mine exploration and mineral processing at Mines and Mineral Ministry, minister’s representative at the Supreme Council of mines, member of International Mine Committee, affiliated with the United Nations as well as chairman of Iranian National Committee World Mining Congress (INCWMC).

Ali Akbar Kashi Ghandi, CEO of Khakroud Company:

We obtained dam construction qualification certificate (Grade I)

Khakroud Company was established in 1985, with its focus on construction operations. However, after defining new goals for the company and during a four-year period, Khakroud is now focusing on hydropower plants.

Ali Akbar Kashi Ghandi, the company's chief executive, says, "Power plant and dam construction are Khakroud's main fields of operation at the moment."

"Working on Tajikistan's Rogun project, with 3,600 MW capacity and 1,000 employees (both Tajik and Iranian), are among successful projects of the company," he added.

According to him, Khakroud is mostly in charge of underground operations of the project such as transformer cavern, watering systems including shafts and tunnels.

"Rogun Dam, with 335m height, is the tallest dam in the world," he says, "This part is done by the Italian company Salini, whereas the remaining parts, namely the power plants and excavations, is done by Iranian firms."

Kashi Ghandi added that the number of hydropower plants projects in Iran is limited at the moment, "As a result, Iranian firms are mostly working in foreign countries."

The CEO believes Iranian and Turkish firms are world's top dam constructors, after China.

"We are self-sufficient in several aspects of dam construction operations, including machineries," he added.

He also noted that Khakroud has established a new branch in Uzbekistan to start working on similar projects in the Central Asian country.

Elaborating on Khakroud's recent achievements and plans, the CEO said,

"We have obtained the premium certificate of dam construction from the Plan and Budget Organization…Our focus is totally on similar projects in neighboring countries…we believe that our experience in dam construction projects along with the lower costs of the projects could help us be successful in foreign projects."

Abbas Shahsavand, CEO of Palayesh-e Hesar Mehran Company

We are the most equipped Iranian bitumen manufacturing company, and produce most of the country's requited bitumen products, such as road tars, bitumen emulsions, polymer bitumen, PG bitumen and even a variety of moisture insulators.

Palayesh-e Hesar Mehran Company was registered in 1985. In 1992, the name of this company was changed to Ayegh Hesar Mehran, and now it is active under the name of Palayesh-e Hesar Mehran Company. The company has been active in the field of producing bitumen for construction since 1992 and has had a good market both inside and outside the country. In 2016, the managers decided to expand the company. This is a family company, and six of Shahsvand brothers are jointly monitoring and managing all the affairs.

Abbas Shahsavand, the CEO of the company said since 2016, they have launched the most complete bitumen manufacturing company in Iran with the most up-to-date machines and the most equipped devices, with a capital more than 300 billion rials received from shareholder's investment.

According to him, the emulsion machine uses the latest technology in Italy and also for the mass production of polymer bitumen, the major parts have been imported from Germany. In the course of development of the company, when the tools and internal parts were responsive, in order to support the domestic production, Iranian tools and devices are used.

Shahsavand adds: There are two bitumen companies in the state owned and semi-state owned sector (private sector), and in the private sector we also have collaborators with vast activities in this area.

He continues: According to the officials of the Ministry of Roads and Urban Development and other public and private sector visitors, the company is the most equipped company in Iran's bitumen industry.

The CEO of Palayesh-e Hesar Mehran Company says: The Company produces 1200 tons of road construction bitumen, 15 tons per hour of bitumen emulsions of the best quality without errors by full automatic devices and 150 tons of polymer bitumen. Moisture insulators are also available with three brands, Isogam Hesar Delijan, Isogam Tavangostar Delijan and Nano-Pashme shisheh Hesar.

Shahsavand says: "All primary consumables are made from domestic petroleum products, only in the emulsion section, emulsifiers are imported from abroad, and foil and tissues are also imported from outside the country in the production of moisture insulations." But in the company's bitumen production sector, the products come from domestic refineries. Also, the company's proximity to the refinery is of advantage, because we have 8 km to the Tehran refinery.

He points to the export sector, saying: "We had exportations to Pakistan in the past, but recently Georgia, Turkey, Pakistan, Iraq, Afghanistan and Uzbekistan are our regular customers."

Referring to international and national standards and certificates, Shahsavand added: Bitumen standard is the same for all companies and has a 9-level test that determines a high level of quality. Recently, new bitumen called PG bitumen or performance grade (functional bitumen) has been made, which is made according to the climate of each place.

He goes on to say: about the standards and certificates, I must mention that the company has received the ISO 9001 certification in 2015 in the field of product quality, CE certificate from Europe for export, EFMD certificate from the European Management Development Foundation, International Business Management Training, and the IGP Certificate of Commitment to Quality and also, the most important of these, the 17025 certification of the laboratory that is the certification of laboratory competence and anyone who holds this certificate is practically a partner in the standard office.

The CEO of Palayesh-e Hesar Mehran Company said: The company is a member of the Association of Standard and Quality Supporters and has a commitment to quality. We are also the holder of the Technical Certification Center of the Ministry of Roads and Urban Development for the production of PG bitumen.

Shahsavand continues: Currently, due to currency problems, the company's exports have decreased, while our company is able to produce 1000 tons of bitumen daily and export it. Most intermediaries tend to pay in rials, and this is not possible in the current situation, and foreign exchange commitments have stopped our exports.

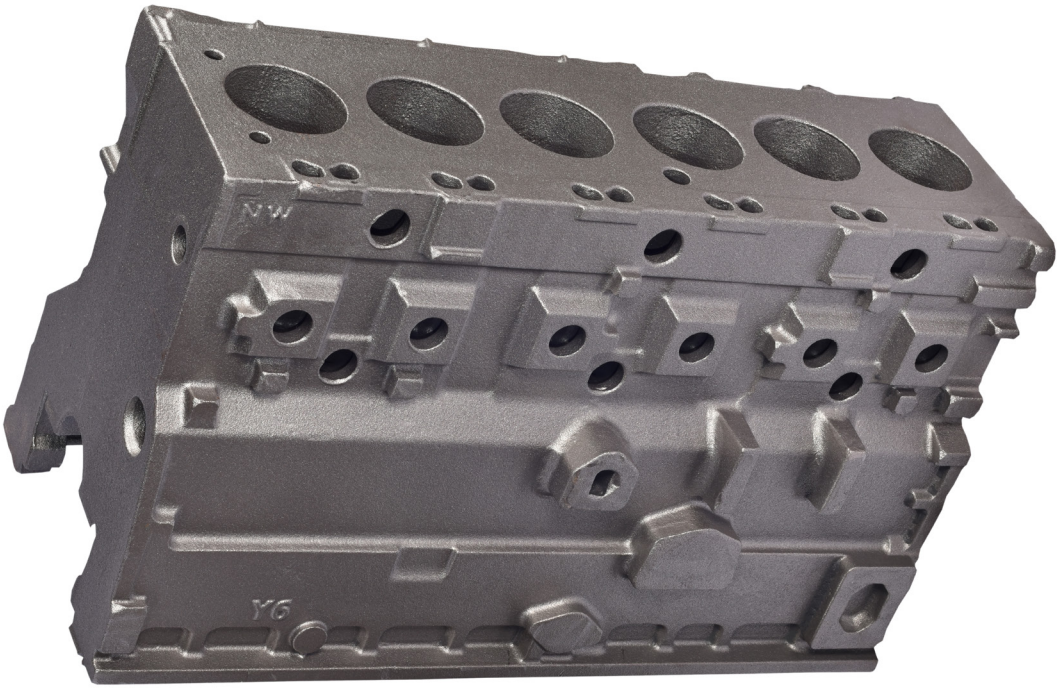
That is, when the government cannot bring the foreign currency from the sale of oil and other products to the country, although all the doors are open for it, why should it ask us and how we should bring the currency into the country. These are the guidelines that stopped exporting.

He says: "Fortunately, whatever technology and planning are necessary for the progress of work and production, the company's executives have come up with scheduling, in a way that our daily output reaches 1200 tons of bitumen.

In the end, we hope that the export sector will provide good solutions from the relevant authorities.

Managing Director of Takado: Takado; giant Iranian mining, industrial, engineering holding

Most of the subsidiary companies hold quality management certificates as well as the total cost system. Mr. Dadvand, Managing Director of Takado Company said: "The Company was established in 1990 as a privately held company and became a Public Joint Stock Company in October 1996. The logo was accepted by the Tehran Stock Exchange on September 11, 2012. According to him, the registered capital of Takado Co. currently stands at 800 billion Rials and the activities are being carried out in four specialized holdings, including mining, industry and engineering services, commercial, transportation and financial services along with stock affairs, and in the form of 20 subsidiary companies. Besides the creation of direct and indirect employment of 2100 people, the company has met the demands of the private equity community of 50,000 people as well.



Per M.D of Takado Company some products of this firm are as followings : production of 500.000 metric tons of Coal (equal to 20 percent of total production in country) in " Negin Tabas Coal " , " construction of Takafar Sepahan mine ", Ehya Tabas Coal " and " Mehr Azin Coal " companies .

Also 250.000 metric tons of coal concentrate (equal to 15 percent of total product in the country) is produced by this firm in " Tabas Parvadeh coal " company . Mr. Dadvand added .

According to him, the company is the largest producer of manganese stones in the country and the Middle East with a capacity of 100,000 tons of manganese per year for use in steel mills including Esfahan Steel Company and Ferroalloy Production Plant in Iran's Manganese Mining Company. Managing director of Tekado Co. says 300 thousand tons of calcium dolomite and industrial lime per year (equal to 65 percent of domestic production) are produced by Fouladafza Sepahan and Nasouz Ekbatan Sepahan companies. These material are used in the country's steel industries.

He added: providing technical and engineering services and manufacturing of heavy equipment needed by the country's industries and other economic activities including trading, shipping, loading ports and shipping, and acting in the affairs of stock and stock broking, are among the activities of the company. He points to the export potential of the company and continues: According to the country's domestic demand for crude coal, concentrates, manganese stones, calcium dolomite, and industrial lime, the main products of domestic companies have been reached, but according to the export potential The products have been exported to different countries, including the export of 100 thousand tons of coal concentrate from 2010 to 2012 years to China and India. Managing director of Takado Co., referring to the company's international certificates and standards, says: Most of the subset companies are holders of quality management system certifications.

10,000 tons of our products are sold in Europe per year: ITFCO managing director

Iran Tractor Foundry Company is the largest such foundry in the country that was first set up to meet the needs of Iran's tractor-making sector. However, in addition to meeting this sector's needs, the company has been using its excess capacity to supply other domestic and international clients as well.

Currently the company meets all the needs of Iran Tractor Manufacturing Company (ITMCO) for cast iron parts. Iran Tractor Foundry Company allocates 50% of its production to ITMCO and the remaining 50% to other industries and exports.

ITFCO productions are order-oriented, planning its production

based on the client's needs. Currently, it produces more than 400 kinds of parts per year that are produced in 200 tons per day and delivered to clients. The majority of ITFCO's production is used in domestic and international car-making
industries.

"ITFCO's raw materials are ingots and scrap metals that are obtained by domestic suppliers. Other raw materials and various additives are bought from both inside and outside the country. The company's trade surplus is positive and its forex revenues, obtained from exports, is more than its forex needs," said Iran Tractor Foundry Company's Managing Director Abdolrahman Arshadi.

Each year 28% of the company's sales are due to exports, that is, 10,000 tons of car and tractor spare parts.

ITFCO is built on a 60-hectare land with workshop infrastructure of more than 70,000 square meters. The high quality of the company's products are because of its exports to European markets, according to its Managing Director Arshadi who went on to say that most of its foreign clients have chosen this company to meet their needs.

"Apart from all the foundry regulations, the client can also tell us about their special needs for their orders," said Arshadi.

There are more than 50,000 foundry units in the world, producing some 110 million tons of all cast iron, steel and other products, 70% of which are cast iron products. In other words, each foundry produces some 2,000 tons on average and ITFCO is one of the biggest factories according to its production volume and variety of its products, rendering more than 400
varieties.

Italy and Germany are the main European target countries for ITFCO exports, according to Arshadi, who said that ITFCO will have exports to other countries on its agenda
as well.

Ahad Kermani Managing Director of Ferdows Textile Mill:

We produce 10 Metric tons of different types of yarns such as combed cotton , polyester viscose and pure viscose yarns confection

Three spinning, knitting, and projects have been accomplished through the company's development plan.

Ahad Kermani,Managing director and board member of Ferdows Textile company said: the operation of Ferdows Textile co. was halted for 14 years. Since 2002, I have accepted the management of the company, and during 17 years this company has become an active manufacturing company. The factory produces 10 tons of various yarns per day in four groups and three job shifts. He added: After the spinning unit was set up, a number of round knitting machines were set up in Ferdows city. These executive units are in the form of outsourcing to the Ferdows textile group, and now more than 30 knitting machines are operating in the cities of Ferdows, Mashhad and Karaj. We work with these units in the form of journeywork, which means we provide them with yarns and sell the fabric they produce. Kermani refers to the factory's products and continues: different types of cotton yarns with counts of 30, 40 and 50Ne, polyester ,and viscose yarns with the same ones. Managing director of Ferdows textile factories says: We export our products to Iraq and Turkey. The production of yarn, fabrics, clothing, baby clothes and men's underwear are of Ferdows textile mill exports. Due to the high customs tariff for imported goods in Turkey, about 50%, our exports to the neighboring country stopped. The reason behind this substantially high tariff is the protection of their domestic production.

He underlined the certificates and standards gained by the factory and added: Getting the national standard for the production of yarn and obtaining a quality certificate from Geneva in 2010 is one of those. Kermani says the yarns produced by Ferdows Mill are distributed under Ferdows brand. The clothes are produced with three brands of Ferdows, Paradise and Shinako. The baby clothes brand is also K&F. Managing director of Ferdows textile factories pointed out strategies to overcome obstacles and problems, saying: "In the year 2003, we imported machinery from Italy. At that time, the plant became operational in less than 14 months. At that time, the interest rate on the banking facility was 2 percent, but at the moment, the banks' interest rate is very high, which is not consistent with the limited profit of the factories. According to him, the note 1 in Article 20 of the law of obviating impediments, which was approved by the Parliament, explicitly states that companies using the currency reserve fund should settle their rates at the opening rate and settle with the bank. Unfortunately, the government rejected the law and issued a regulation that is calculated from the date of 24 Sep. 2012 at a preferential rate of 15% related to the repayment of the loans. Currently, the allocation of foreign currency for the import of spare parts of the production line is not suitable and causes difficulties, as the currency needed for the purchase of spare parts is euro, and the operating banks hardly accept currency transfer. This has actually stopped the production line.

Ahad Kermani

Managing director and a member of board of directors

Iraq, Our Top Export Destination: Sepahan Industries CEO

Sepahan Industrial Group is operating as a holding which includes four major companies, says Ahmad Jaryan, the chief executive of Sepahan Industrial Group, adding that the group is now the largest producer of pipes and steel tubes in Iran.

The company accounts for 50% of the national pipe and steel tube output, whereas the share is above 50% for natural gas pipes, he says.

Referring to Sepahan's years of experience in manufacturing industrial pipes and steel tubes, gas pipes, tested pipes, precision tubes, Jaryan says, "Sepahan was the very first producer of gas pipes in Iran."

"Before we start manufacturing gas pipes, Iran had to import, usually low-quality pipes, putting a considerable burden on country's foreign exchange resources," he said, "Our products are in accord with industrial standards and offer competitive quality."

The key point is that the raw material needed for developing Sepahan pipes is provided by Mobarakeh Steel Company, which is the leading steel company in terms of quality, Jaryan added.

Elaborating on his company's capacity, the CEO said, "Currently, three production plants in Isfahan are operating two to four shifts a day…Moreover, our performance in stock market has also experienced a considerable growth in recent years."

Thanks to the high quality of our products, and the CE certificate; companies in neighboring countries show interest in purchasing our products.

Jaryan believes that his company could export higher volumes of goods, if some of the regulations go through small modifications.

"Iraq is our top export destination," he said, "Afghanistan and Turkmenistan are ranked second and third, respectively."

The CEO noted that Sepahan has well-equipped laboratories, capable of issuing certificates for other companies.

Moreover, operations in the company are fully in accord with ISO standards, he said, environmental certificates are renewed on a regular basis.

CE certificate is the most important certificate obtained by Sepahan, in Jaryan's opinion, "as it allows us to export goods to Europe."

Sepahan has also been working close with Iranian Standard & Industrial Research Institute (ISIRI).

Jaryan says that his company will always focus on development of its activities. "A large portion of our revenues will be invested in development projects….Export, as a potential contributor to countries employment rate and foreign exchange revenues, is of high priority for us."

"Most of the manufacturers in Iran have put all their focus on boosting production at the moment, hopefully, some modifications in regulation could help lift the volume of Iran's non-oil exports," Jaryan added.

Shimi Tejarat-e Naghsh-e Jahan; Iran private sector's biggest bitumen factory

Saeid Memarian, The President and head of board of directors in SHIMI TEJARAT-E NAGHSH-E JAHAN CO.

One of the biggest bitumen Factories in private section.

Our Factory Equipped and Standardized by Machineries with Highest Technology in the World.

SHIMI TEJARAT-E NAGHSH-E JAHAN CO.

Allowed to establish in 2011 and came to production in 2013. The company has the ability to produce bitumen with a variety of grades and a monthly capacity of 30,000 tons.

Saeid Memarian, the president and head of the board of directors in SHIMI TEJARAT-E NAGHSH-E JAHAN CO, says: packaging the products in bags is one of the company's special services. Packages made in 300 kg bags, and all related machineries imported from Austria. Actually this packaging system is exclusively performed by SHIMI TEJARAT-E NAGHSH-E JAHAN CO. In Iran.

Mr. Memarian Mentions Company has been established with private investment of over $10 million and one of the most equipped and standardized bitumen factories in the region.

According to Mr. Memarian, 100% of raw materials are supplied from domestic refineries. The heaviest substance in the distillation tower is the Vacuum bottom, which is the main material used by bitumen factories.

Based on Mr. Memarian said, his factory produces 5% of total exported bitumen of country. Considering 5 million tons which is country's annual bitumen production, the total share of SHIMI TEJARAT-E NAGHSH-E JAHAN CO. Meets about 10% of domestic demand.

He says the amount of domestic demand for bitumen is depends on development budgets. And same amount can be changeable based on demands of major consumers such as Municipalities, Ministry of Roads and Urban Development and Housing Foundation and Education Organization.

Based on Mr. Memarian words, their target markets mostly are India, Pakistan, Afghanistan, China, East Africa, Myanmar and Bangladesh.

The President and head of board of directors in SHIMI TEJARAT-E NAGHSH-E JAHAN CO. declared they received ISO 14000, ISO 9000 and ISO 18000 standards as well as all the national standards with special cooperation with the standard laboratory.

He believes, professional staff, technical engineers, expert advisors and high experienced ones making important roles in the success of a company, and stated: "All processes of production as well as packaging and transportation, arranged & carried out by SHIMI TEJARAT-E NAGHSH-E JAHAN CO.

Sulfonation unit was developed to enter world markets: Behdash Chemical Company CEO

Behdash Chemical Company, the first and the largest producer of anionic surfactants in Iran, started operation in 1983 with the launch of its first sulfonation production line, through the efforts of its founders.

Davoud Abedi Amoli, CEO of Behdash Chemical Company, says, "Since then, with the mission of producing all the raw materials needed for detergent industry in Iran and to compete with foreign rivals, Behdash Chemical Company has produced the required products via expanding and developing its capabilities by building new manufacturing plants. Behdash Chemical Company completed its product portfolio in the years following its establishment with the construction of an oleochemical plant.

Mr. Abedi Amoli also adds that due to the urgent need of the country and the satisfaction of foreign customers, development of the sulfonation unit was aimed at entering the global markets. In addition, in order to respond to intra-organizational needs and for business development in the context of petrochemical activities, an ethoxylation unit was established in the company.

In order to complete the opportunity to provide better services to detergent manufacturers in the country, in 2009, silicate and zeolite units, with capacities of 80,000 tons and 40,000 tons per year respectively, were launched.

With the production of zeolite, despite the country's self-sufficiency in this product, an alternative to the use of sodium tripolyphosphate (STPP), which causes environmental pollution, in the production of detergent powders was provided to the domestic detergent industry. In order to complete the formulation of detergent powders compared to consumption of STPP we produced a copolymer product that is partially consumed in the formula a4 zeolite.

Abedi Amoli goes on to say: The research unit created a product called Kogranol (sodium silicon carbonate), which has various uses, including as a slurry diluent, in the formulation of tile mats, hardening agents in detergent powder formulations.

Due to the company's constant efforts to innovate in the production of new products in the market and to expand its activities in the oil, gas and petrochemical industry, the company is constructing catalyst production units including, 3a 4a NaY, UsY, ReY, 13x, 5a, FCC , RFCC, that will be operational by the end of the current year (March 2020).

Also as per a contract with the Petrochemical Technology Research Institute through gaining basic science and engineering, we are engineering the details to design ZSM-5 catalyst, and are also in the process of building factories to complete the formulation of catalyst lines in order to produce binders and matrices.

He added, "Since the establishment of its production unit, Behdash Chemical Company has been concentrating on exporting its goods, thus doing market research in the region and has been able to export its products to the neighboring countries.

After the collapse of the former Soviet Union, the company ceased the opportunity and began exporting goods to the CIS countries. At present, Behdash Chemical Company exports more than 20,000 tons of its products annually to Azerbaijan,

Armenia, Afghanistan, Pakistan, Turkey, UAE, and Malaysia as well as Ukraine, Tajikistan, Uzbekistan, Turkmenistan, Georgia, Kazakhstan, Kyrgyzstan and more.

According to the CEO of Behdash Chemical Company, if the export platform of the country is ready and the possibility of banking ties between the Iranian banks and the banks of the target countries are provided, the chemical company of Baddash has the potential to export at least one third of its manufactured products and meet the needs of the domestic production units. Our colleagues at Behdash Chemical Company are engaged in full time effort to achieve the high goals stated set the company.

He considers Behdash Chemical Company consisting of two units: Sulfonation Unit (Sulfonation and Sulfation). Behdash Chemical Company with production capacity of over 50,000 tons per year and over 30 years of work experience, is able to produce all kinds of sulfuric acid and sodium ether sulfate with highest quality

Oleochemical unit with multipurpose reactors for various products: Behdash Chemical Company is one of the

leading companies in the production of oleochemical products with 4 multipurpose reactors. Its production unit is capable of producing more than 20 different products used in the cosmetics industry.

Pointing to other units of the company, Abedi Amoli adds:

Ethoxylation and Propoxylation Unit: Behdash Chemical Company is one of the few privately owned companies with an ethoxylation unit in the country. The company has the capacity to produce 6,000 tons of ethoxylation or propoxylation.

Sodium silicate unit (solid and liquid): With a production capacity of 80,000 tons per year, the Behdash Chemical Company's plant is the largest production plant of its kind in the country.

A4 Zeolite Production Unit: Behdash Chemical Company, adhering to its motto (Authentic, Reliable, Progressive), is the first A4 zeolite production unit with a capacity of 40,000 tons, and in the oleochemical unit, a copolymer with capacity of 8,000 tons per year in the country supplies the industry in the country and the region. Also in machine manufacturing units, packing machines for detergent powders at 240 cans per minute and various types of plodder and sheeter for soap lines and dozens of different types of machines are produced.

The machine manufacturing unit is also able to produce different types of reactors, stirrers, and head exchange cells.

The CEO of Behdash Chemical Company points to the soap production unit (Soap Chips and Oily Soap) and says, "Considering the company's soap production experience, we can produce 18,000 tons of quality soap per year."

According to him, Behdash sulfonation plants are capable of producing a variety of simple and natural ethoxylates of the synthetic and natural type of alkylates and alpha-olefins and the like that are sulfonated and produce a variety of sodium, potassium and ethanol amines (mono-di and tri-).

The company is capable of producing amphoterics, nannonics, cationics, anionics and STS in the oleochemical unit. The above ingredients are usable in a variety of formulations related to industrial detergents, toothpaste, household detergents, soaps and more.

The company is now able to supply a significant portion of raw materials for health and beauty factories. The products of this company are certainly competitive with the best foreign products.

With strong R&D and a variety of pilot plants, our company is finding a way to make our country more self-sufficient. This company, with the strongest R&D, has also registered over 31 intermediates and raw materials.

Behdash Chemical Company has ISO 900114000 and 18000 ISO as well as Accreditation laboratory and ISO 17025.

According to Abedi Amoli, the products of Behdash Chemical Company are as follows:

1	(Sodium lauryl ether sulfate 70% (SLES	Behdapon-N70
2	(Linear alkyl benzene sulfonic acid (LABSA	Behdacid
3	(Ethylene glycol monostearate (EGMS	Behda-EM
4	(Ethylene glycol distearate (EGDS	Behda-ED
5	Pearlized sodium lauryl ether sulfate	Behdapearl%28
6	Triethanolamine lauryl ether sulfate	Behdamin-T
7	(Sodium toluene sulfonate (STS	Behdaset
8	Didodium lauryl ether sulfosuccinate	Bbehdaccinate
9	Maleic-acrylic copolymer	Behda copolymer
10	Coco amido propyle betaine	Behdaeen
11	Coconut di ethanol amide	Behdamid-D
12	Sodium silicate solide	Silma
13	Sodium silicate solution	Silma
14	Cogranule	Behdasequest
15	Zeolite 4A	Mazeo 4A
16	Coconut mono ethanol amide	Behdamid-Mono
17	behda Sodium silico carbonate	Cerma
18	Ammonium lauryl ether sulfate 70%	Behdamon
19	Coco amphoacetate	Amphoacetate

Alimardan Alaei Jourdehi, Managing Director of Chauffagekar Co.:

We are the only manufacturer of solid fuel cast iron boiler in Middle East

Chauffagekar Industrial Company was established in Tehran by a group of people interested in casting and smelting in 1972.

Cast-iron boilers, bathtub and radiators were its first products. The company was operated in a 300-hectare area and 40,000 square meters in 2017.

“After studying and analyzing heating system in our country as well as other various countries on that time and desirable, the company’s founders came to the conclusion that Iran’s heating system isn’t standard. Then, the industry was set up by the help and expertise offered by German experts,” said Alimardan Alaei Jourdehi, Managing Director of Chauffagekar Industrial Company.

“Now, the company produces heating systems, engine room, wall-hung boiler, floor-standing boiler, solid-fuel boilers, various cast-iron products and cast-iron radiators.” he added.

“Since 2003 our main goal is exporting, because we believed that export could add to the company’s technical knowledge and help us to gain the latest know-how,” said Alaei Jourdehi.

“Our target in 2019 is to export half of our products to Spain, Italy, Greece, Turkey and other regional countries,” and hope to reach it by efforts of Chauffagekar team, he added.

Most of the Chauffagekar Industrial Company machineries and equipment are German-made, and over 90% of the factory’s needs are supplied from Iran market and only 10% are imported from overseas, he said.

“Chauffagekar Industrial Company supply 85% of the domestic market’s needs for central heating system and cast-iron boilers. It’s the only producer of solid fuel cast-iron boilers in the Middle East which is a great opportunity to become well-known in international markets,” Alaei Jourdehi stressed.

His company has been able to present its brand by participating in international exhibitions like Milan, Italy, German, Moscow, Azerbaijan, Uzbekistan, Lebanon and Saint Petersburgh.

Chauffagekar Industrial Company has 85% share of domestic market for cast-iron boilers and 60% share for floor-standing boilers, according to its managing director declaration.

He pointed out export issue and mentioned : we started to add to our capabilities from 2003 under the slogan “global communication leads to increase of world knowledge”.

“Quality, on-time supply and good prices are the three factors of Chauffagekar Company to introduce itself to the world our target markets are Spain, Italy, China, Turkey and CIS countries and Greece as our agent in Balkans”, noted Alaei Jourdehi.

“We have acquired CE standard for some of our products, GOST standard for exporting to Russia and all national standards as well as ISO9001-2015,” he reiterated.

Chauffagekar Industrial Company managing director mentioned: “by efforts of our team we got national certificates awards, including national standard top award in 2016 and 2017, top exporter award in 2015 and 2016, top provincial exporter in 2017 as well as top consumer rights protector in 2015, 2016, 2017 and 2018.

Dr. Mehdi Bostanchi Deputy CEO of Damandeh Company:

“Damandeh” is the largest air conditioner manufacturer in the Middle East

Dr. Mehdi Bostanchi, the Deputy CEO of Damandeh Company was born in an Industrial Family and received a Bachelor’s Degree in Industrial Engineering. He managed to receive an MA in IT and got a Ph.D. in business management with an attitudinal swing. He has worked in various positions over the years such as trainer, consultant, and board manager of several companies. The following is the result of a conversation with the deputy CEO of the company. Dr. Mehdi Bostanchi, Deputy CEO of Damandeh Company, the oldest manufacturer of air conditioners in the country, with 50 years of experience says: “Damandeh Company now has the largest fan and air conditioner manufacturing site in the Middle East. The company was founded by one of the country’s greatest entrepreneurs, Mr. Ahmad Bostanchi, who is currently managing the company. Damandeh Company is controlled by the family and has 750 staff.

He points to the company’s products and continues: the Damandeh Company produces electromotor air conditioners and various grades of all variety of fans include household, industrial, tunnels, parking fans and those used in the home appliance industry.

The deputy CEO of the company noted the production capacity of the company and said that the company has a production capacity of more than 3 million fans a year. The company has advantages over domestic and foreign manufacturers, including the self-sufficiency in the production of electromotor of fans.

According to Dr. Mehdi Bostanchi, 95% of the raw material used by the company is domestically produced, and only 5% of consumables and special industrial materials are imported. All the steel and copper sheets are also supplied from domestic companies. He adds that 30% of the products are exported to 16 countries, mostly neighboring countries, CIS and Turkey. There is no domestic competitor, and most of the market countries are covered by Damandeh Company. We have no rival in the nature of products and variety. Every year, several new products have been added to our product portfolio last year, for example, the new products of the home appliance industry, tangent fans, connectivity fans and blower devices. The deputy CEO of Damandeh Company pointed to the international certifications and company standards, saying that the company has a total of two certification groups. The first group includes management certifications such as ISOs, including ISO 9000 of management, ISO 1400 of environmental care and ISO 18000 which is for customer satisfaction.

Dr. Mehdi Bostanchi continues: The second group of standards are for the product including 1- General group including Iran standards 2- European Ce standards 3- standards for smoke products and parking standards that have very difficult standards. These products are only sent to the Middle East’s first laboratory which is in Turkey.

He added: “In cooperation with the Research Center of the Ministry of Housing and Building, we are building the Smoke Laboratory in Iran, which is the second such specialized laboratory in the Middle East.” This lab will help to localize this industry. Initial work is done and we are in the process of construction of the desired building. The deputy CEO of Damandeh Company: “We have been selected as the best exporter of Tehran province for several terms. On the day of the Industry and National Festival of Consumer Rights, we have received several awards in several courses.

He refers to the motto of this year called the production boost, saying that the country’s industries are divided into large, medium and small groups. The number of workers

in small businesses in each factory or workshop is usually less than 50 people. While the frequency of small and medium-sized industries is very high and the mainstay of employment rates are in these industries, unfortunately, they have no voice in the society and more attention is paid to the large industries. I think the first step is to focus on the medium and small industries.

The deputy CEO of Damandeh company outlined the most important barriers to the manufacturer’s path and said: that foreign sanctions have had a huge impact on the industry and domestic production, but traders and craftsmen have always found ways to overcome sanctions. But what makes work harder is internal sanctions and changes to export and import laws and regulations, as well as extreme price fluctuations. Exchange rate fluctuations are more harmful than the exchange rate increase in the production process.

Dr. Mehdi Bostanchi points to the promising message of a manufacturer and continues: As a manufacturer, despite a lot of problems last year, we had 30 personnel increase, and we plan to add 50 people to the Damandeh factory this year. Despite the pressure of laws and regulations and sanctions, the company is more determined to increase its products and higher their quality.

Resitan Company is top national exporter: Managing Director

Resitan Company was established by a group of investors and founders of Chauffagekar Industrial Company, Pars Metal Group and Iran Ferrosilice Company in 1982 after the cycle of raw materials used in the casting industry was completed.

"Resin and its products are the base material for industries such as decorative and industrial paints, artificial stone, brake pads, casting and molding industries, composite and fiberglass industries, … that used to be imported," said Mehdi Hajibaba, Resitan Company's Managing Director.

The company's first phase was set up in 1982 with a capacity to produce 29,000 tons of all kinds of resins such as phenolic resins and foundry resins. Production of alkyd and polyester resins started in 1994. And in 2006, the second phase of Development kickstarted and was completed in 7 years.

"Resitan Company exports to India, the United Arab Emirates (UAE), Uzbekistan, Tajikistan and Armenia," said Hajibaba, adding that the majority of exports go to Iraq.

Resitan Company was chosen as the top national exporter in two consecutive years 2013, 2014, top provincial exporter 2017, 2018, top provincial industrial unit in 2018. It's also the holder of Grade 1 Golden Trade Card.

"200 bright-minded experts are already work at Resitan Company. Resitan company with its R&D unit, that is equipped with the latest devices and technologies of the day and with the help of experienced specialists and experts has taken a big step in meeting the demands of various industries by using the latest and newest formulation and world standards," mentioned Hajibaba.

Fatty acids, alkyd resins, saturated and unsaturated polyester resin, vinyl ester, phenolic resin, acrylic resin, bakelite, amino resin, solid epoxy resin and solid polyester are among the products of Resin Company.

"Our company is proud to produce more than 80,000 tons of over 130 types of industrial resins that are used in various factories and industries," Resin Company's managing director mentioned.

Here is a list of some of those products and their applications:

Alkyd resins and modified alkyd resins (long, medium and short oil) used in painting and coating industries, …

Amino resins (Melamine Formaldehyde, Urea Formaldehyde, Benzoguanamine Formaldehyde) used in painting and coating industries, ...

Epoxy Ester Resins (furnace and air-drying) used in painting and coating industries, …

Solid Epoxy Resins used in powder coating, electronic industries, ….

Solvent based Acrylic resin including thermoplastic and thermoset resins used for traffic paints, wood, paper and plastic surface coating, printing ink, finish paint, …

Water-based Acrylic resins used in interior and exterior paints, glaze paints, polishes, primers, concrete paint, textile industries, …

Saturated polyester resins used in industrial paints, can and coil coating, automobile

Solid polyester resins used in powder paints production

Unsaturated polyester resins used in fiberglass, pipe, marine industry, artificial stone industries, …

Foundry resins and hardener resins used in casting and molding industries

Phenolic resins (novolac, resol) used in brake pad production, sandpaper, grinding wheel, refractory products, insulation felt, can coating, …

Phenolic molding powders (Bakelite) used in electrical parts, gas and electricity boards, lamp couplings, kitchen appliances, …

Vinyl Ester resins used in production of pipes, fiberglass tankers, profiles, chemical storage tank, surface coating, ..

"Resitan Co. By trusting Iranian expertise has been succeeded during the past three decades in production of different kinds of resins used in various industries such as casting, painting, composite, … that not only meets the internal demand but also exports to other countries, turning into the top national exporter for several years," added Resitan Company's managing director.

Pardis Motor Oil Company exports more than 80% of its products all over the world: CEO

Pardis Motor Oil Company as a used oil re-refinery that started in 2004. The company has been exported since 2005 and now more than 80% of products are exported to other countries.

"Company's final products are lubricants The high quality products such as ; Engine Oils, Industrial Oils, Gear Oils and Hydraulic Oils,… according to national and international standards" said Pardis Motor Oil Company's Managing Director Foroozan Tayebi.

" West Africa, Far East and Middle East countries are the main export destinations of Pardis Motor Oil Company's products. And also, Pardis Motor Oil Company has been chosen as the top exporter in Kerman Province for 12 years , it received product quality certificate from France in 2011, and some other local certificates' managment , best quality , eco-freindly ,… . ''added Tayebi, (CEO).

Iran Carbon Company is oldest producer of carbon black in Iran: CEO

Shakur Shams, Managing Director of Iran Carbon Company (ICC), has a BS in Chemical Engineering, specialising in petrochemical industry. He has worked in Mahshar Petrochemical Special Economic Zone. He is Iran Carbon Company's Managing Director since 2013.

"Iran Carbon Company is the oldest manufacturer of carbon black in Iran. It was founded in 1972 in the southwestern city of Ahvaz in a joint stock with the American Cabot Corporation. It started work producing 16,000 tons of different kinds of carbon black in 1974," Shams said.

"Given the fact that tyre manufacturing in Iran needs carbon black, a 36,000-tons per year followed by unit No.2 was built in 1994. ICC, a year later, it was turned into a Public Company and joined the Petrochemical Industrial Investment Company (PIIC). The company entered the stock market that same year," he added.

Carbon black is used to produce rubber parts, black masterbatch, tyre, tube, paint and resin as well as printing ink.

It uses the oil and petrochemical byproducts. The company is provided with special hydrocarbon products containing aromatic materials and turns them into a value added product, carbon black through combustion process. Carbon black is a specialised product categorised as a middle product or chemical materials.

"Carbon black is produced through incomplete combustion in the plant reactors. It's made of black powder with small particles. Carbon black is one of the main components of tyre. 25% of the tyre's weight is carbon black that makes up part of the compound through the compounding process," Iran Carbon Black managing director explained.

Carbon black is used in tyre manufacturing to increase its elasticity, treadwear rating, resistance against light that is mixed with other components easily, used as a filler and reinforing agent in tyre and tube production, according to Shams.

"Iran has the capacity to produce 360,000 tons of tyre while only 75% of this potential is used. Each year 270,000 tons of tyre is manufactured, 70,000 tons of the rubber's raw materials is made of carbon black that is supplied by domestic producers," he mentioned.

Iran needs 600,000 of tyres in 1402, showing the huge potential there. "If we can reach this production, carbon black production capacity will also increase as well," according to Shams.

"Although Iran Carbon is the oldest manufacturer of this material in the country, it's not the only one. Three more big producers such as Doodeh

Sanati Pars Company, a subsidiary of Iran Carbon, Carbon Simorgh Company and Sanati Doodeh Fam Company (SADAF)," Sham said.

Currently, the total carbon black production is 146,000 a year, according to Iran Carbon Company's managing director, who said that his company's share is 32-33%. "Some of our production is exported but our first priority is to meet the domestic demands. The rest will be exported," he noted.

"Iran Carbon Company's has a nominal capacity of 36,000 tons a year. The company recorded 37,000 tons production record in 1397 (to 20 March 2019), that is, 4% higher than the company's nameplate capacity. Out of the 36,000 tons that were sold, 33,000 allocated for the domestic market and 3,000 tons for export," Shams mentioned.

The company's export revenues were 7/2m$ and $3m in 96 and 97 respectivley he noted.

"As we have been producing the highest quality products since the onset, we haven't had any quality or packaging problems in our exports," he stressed.

Turkey, the United Arab Emirates (UAE), India, Pakistán, Indonesia and Vietnam have been Iran Carbon Company's main export destinations. "The majority of exports are to Turkey and India, especially Turkey as it produces very high quality tyres but doesn't have any carbon black production. Due to high demand, being neighbours and good economic relations, we can export to Turkey," Shams noted.

Iran Carbon also used to export to eastern Europe after it acquired the REACH Certificate of Compliance. "We have been awarded all related certificates but our priority is the neighbouring countries," he stressed.

Shams explains that his company has obtained all the necessary standards and certificates such as ISO 14001, ISO 9001, ISO 18001, ISO 17025 that enables laboratories to demonstrate that they operate competently and generate valid results, ISO 50001 on energy management, ASTM, as American Society for Testing and Materials standard.

Iran Carbon has gained the national certificate of protecting the consumer rights from Consumers and Producers Protection Organization since 2013 until 2015. Back in 2016, it was also chosen as the top provincial exporter.

"However, our biggest honours is that we have made Iran self-sufficient in importing this product," Shams said.

"As we have always procured the necessary raw materials for tyre manufacturing and our production lines are ready and the company has produced more than its nominal capacity, Iran Carbon has prevented that forex resources leave the country," he stressed.

Iran Carbon entered the stock market in 1995 as is a subsidiary of the Petrochemical Industrial Investment Company (PIIC), Ta'min Petroleum and Petrochemical Investment Co. (TAPPICO) as well as the Social Security Investment Company (SSIC).

Razi Industrial Group

Ali Reza Ansari / Managinr Director of Artawheel Tire Industrial Complex

Companies working in Razi Industrial Group consist of :

1-Razi Chemical Company

manufacturer of all kind of adhesives for industrial and household uses . three other Cos, Yazd Tire, Goldstone and Razi Tire producing tires.

Razi Company was founded in 1981 in a 100,000-square-metre land with 20,000 meters production line and adminstration office. in Town of Alborz Province. The company employs 350 people.

Razi Chemical Company is the biggest manufacturer of adhesive for home and industrial use Razi Chemical also produce industrial resin in Iran.

What makes the company stand out among others is its diverse products and their high quality.

Razi Chemical Company , beside all adhesives such as silicone , carpet and twin sealants, PVC pipes adhesive , binding adhesive , PVC-C (hard) , Electrical tape , conveyor belt glue, metal glue and allplast produce plastic tubes which are used in cosmetics industry, Plastic and aluminum tubes , insecticides ,

Exports:

All our products are exported to neighbouring countries as well as Central Asia. Although we have many internal and international competitor, Razi Company has been able to introduce itself to the world as an outstanding and top brand.

2- Artawheel Tire Company:

Artawheel Tire Company is the largest tire manufacturer located in northwestern of Iran with one of the best technology to produce all kinds of tires since 1997.

The products include PCR, LT, Truck & Bus, agricultural tires under the brand name of Goldstone.

Artawheel Tire Company's products meet a major part of the national transport sector demand, preventing forex from being spent on importing tires.

Goldstone logo has been very interesting for export countries and considered as an advantage to attract customers. Its logo has been registered in world logos.
Certificates and standards:
National Standard Certificate
Persian Gulf Standard Certificate
Razi was chosen as the top quality producer for eight straight years
It was also chosen as top national producer for two years
It won the third place as the top national safe workshop
Six-time top exporter
ISO 18000- ISO 14001- ISO 9001 - ISO 10015 - ISO 10668 - ISO 1004-ISO 1002 - ISO 50001 - IFDA 16949
3-Yazd Tire:
The company was founded in 1997, employing 1,420 people.
Products:
PCR,SUV, LT, motorcycle and bicycle tires
Part of products are exported to countries such as Niger, Mali, Egypt, Syria, Turkmenistan, Afghanistan, Pakistán and Iraq.
They are produced under the brand name of " Apollo Vredestein B.V." from The Neatherland.
Certificates:
ISO 18000- ISO 14001- ISO 9000 - ISO 10015 - ISO 17025 - ISO 10002-ISO 10004-ISO 50001 - IFDA 169494
National awards:
Top industrial unit in 2005
Top exporter chosen for several times
Top provincial exporter for several times
Top provincial industrial unit
Human resources quality in 2012, 2013
Top spare parts producers in SIAPA internal ranking
Three-star diploma from petrochemical sector
Four-star diploma from national auto award
Energy management awards
IUEI certificate for industrial innovation and inventions

4- Isatiss Company:
is a subsidiary of Razi Industrial Group in Yaz Province. The company produce reclaim rubber which use in tire industry.
5- Razi Tire Cord:
The company was set up in Takestan, Qazvin Province, to meet the internal demand for 400,000 tons of polyester fibers. with annaul capacity of 15,000 tons of polyester cords. Razi Tire Cord was registered in 2017. Last year, the machinery was purchased from the Netherlands and started on June 2019.
6- Carbon Simorgh Company:
Producing all the kind of carbon black used in tire industry. It was set up in Mahallat, Markazi Province with a total capacity of 35,000 tons per year.

Ghatran Kaveh Motor Oil Company sells 30,000 barrels of its products per year

Ghatran Kaveh Motor Oil Company was founded in 1988 on a 30,000-hectare land at Kaveh Industrial City in Saveh County, Markazi Province. The company produces all kinds of engine, gear and industrial oil as well as grease, antifreeze and oil treatment.
The company started its marketing and sales of 30,000 tons of its products in both inside and outside Iran.

Recruiting young and expert human resources, Ghatran Kaveh company has employed 150 sales agents selling 30,000 barrels of its products a year. The agents are taught to use various marketing strategies such as distribution channel, authorised dealers office, as well as hybrid systems.

The company exports some 70,000 barrels of its products each year through such marketing strategies.

“Our company is honoured to produce and sell all kinds of motor oil and other lubricants with good quality based on national and international standards,” said Ghatran Kaveh Motor Oil Company Managing Director Ahmad Ehsani.

Ehsani noted that following the Iraq-Iran war of 1980, his company moved to meet the internal demand and recruit young labour forces to bring about economic growth. Its motto was to raise the quality of Iranian products and make Iran self-sufficient in industrial sector aimed at increasing the productivity through research and development and active presence in associations of oil, gas and petrochemical exporters.

“Despite all the foreigners’ and enemies’ efforts to restrict and sanction Iranian goods and prevent its exports, Ghatran Kaveh Motor Oil Company has been able to export to neighbouring countries, such as Pakistán, Afghanistan, Azerbaijan, Turkmenistan, Georgia, Iraq, United Arab Emirates (UAE), Qatar as well as African states such as Mali, Ivory Coast, Burkina Faso, Tanzania, Benin, Cameroon, Angola, Ghana and Kenya,” he added.

The company obtains the best raw materials for its products, Ehsani noted.

Ghatran Kaveh managing director stressed that all products meet internal and international quality criteria, adding that its laboratory is certified to cooperate with Iranian National Standards Organization. “Our company obtained ISO 9001 quality management standard in 2006.

The oil product company was chosen as the top exporter in the Markazi Province in 2008, 2009 and 2015. It was also selected as Exemplary Industrial Unit for 4 years since 2010. In 2013 and 2014, Ghatran Kaveh was chosen as successful Industrious Unit again. It was selected as standard unit in 2011 and received the Top Brand industrial medal.

“In case the obstacles on the way of production in Iran are removed, we can realise the motto “Yes, we can” by using creative Iranian labour force, resolve the problems and ruin the enemies’ plots,” he emphasised.

Crop Iran exports to Central Asia, Africa and neighboring countries: Managing Director

Crop Iran Company was set up in 1990 in a bid to improve the quality of all chemical and oil lubricants and the special products used in the automotive industry.

Using the modern technical know-how, experienced experts, equipped laboratories, good-quality raw material, the company has produced good-quality products.

Crop Iran Company has been cooperating with domestic and international companies such as Iran Khodro, SAIPA and Pars Khodro.

“Crop Iran products are of two categories: chemical products such as Brake Fluid , anti-Freeze, all kinds of windshield cleaners . Also, produce motor oils such as oil for fuel and diesel engines in various grades, gearbox oil , as well as industrial oil,” says Crop Iran Chemical Company’s Managing Director Mohammad Nakhbaf.

Waterless car wash and turbo diesel oil with new packaging are among the company’s new products.

One of our strengths points is we make the packaging necessities such as bottle and its cap by ourselves .

“ THE CUSTOMER IS ALWAYS RIGHT ” has always been the company’s motto, that’s why we want to keep our customers satisfied.

Crop Iran Company was chosen as top standard unit for five consecutive years until 2018. “We hope this trend continues for a long time by our customers’ support,” said the company’s managing director.

Biuk Sahaf Amin CEO of Vahid Industrial Group

The standard of the products of the company was higher than similar foreign products based on the results of certification institute in Germany

Vahid Industrial Group has more than three decades of activities in the production and supply of polymer plumbing systems and currently consists of three manufacturing Plants all over the Iran. The company offers its products with the most up-to-date manufactured machinery and based on the latest national and international standards. The main products of this company are categorized into three sections of Building Construction, Infrastructure water and waste water piping networks and Drip Irrigation Pipe and Tapes in agriculture.

Biuk Sahaf Amin CEO of Vahid Industrial Group said: "The use of polymer in the irrigation sector was carried out for the first time in Iran by the company's shareholders in 1972. Due to the special advantages of plastics such as ease of use, good resistance, and low cost, it was decided that the irrigation industry should be localized with modern practices. Hence, a factory was set up to build new irrigation equipment and tools based on the latest production standards.

In addition, with the advancement of technology, polymer pipes were a very good alternative for metal pipes in the building sector due to their ease of use, long life, and corrosion resistance. Sahaf Amin stated that we have some new technological products in our product portfolios , PE-Xa pipes with PPSU Fittings are new opportunity for high quality end users in our market, these products are produced with state of art new technology with best raw material for building construction market.

He added , In buildings one the issues disturbing resident comfort is noise pollution and unwanted sound inside the resident area and one of the source of this matter is sewage pipes installed inside the ducts news the wall of the bedroom or dining rooms , to prevent this matter we developed a new product called Muri Silent Pipe which prevent this matter because of using some Nano particle mineral material recently also we add the DIN 4102-B1 Fire class to this product category which is a new demand for high quality contractors in Hotel , Hospital and Residential Towers. Acoustic and Fire test certificates from prestigious certification body in Germany with equal or better result than the European competitors.

Another new application for polymer pipe is using these pipes for riser, cooling tower feeder, district heating main pipes and hot water mineral springs water transportation , For this application we are manufacturing the PP-RCT/GF+PP/PP-RCT 3 layers pipes to compensate the linear thermal expansion also to have easy joining procedure. Branching from these pipes are so easy and it could be easily done without using tee and just by using the branching sockets. These pipes have no corrosion and have much lower insulation layer in hot and cold water installation inside the buildings.

Managing director of Vahid Industrial Group added: of about 90 billion cubic meters of water consumed, about 80 million cubic meters of water is consumed in agriculture sector. There are global standards to save water and to increase the efficiency of water use in the agricultural sector.

Based on this, the amount of consumption per cubic meter of water in proportion to the amount of product produced is the standard measure in the world. The figure in Iran is very low compared to its average in developing countries. In this regard, since three years ago, by purchasing latest technology and transferring it to the country and train them to design engineers and end user, it was tried to raise the productivity of water in the agricultural sector.

He continued: "Using the new technology for the production of labyrinth Irrigation tapes by the company, with the commercial brand of Ultra Tape, for a farm that consumed 12,000 cubic meters of water and produced 60 tons per hectare of Corn crops, through using this new technology, the water consumption decreased to 4,000 cubic meter and the crop production reached 80 tons per hectare. This indicates a reduction in water consumption and an increase in production.

Sahaf Amin referred to exports and said that for construction application pipes like PP-R , PPRCT/GF , PE-Xa and Silent Push fit pipes we have export customer in Persian gulf neighbor countries like Qatar and UAE , Russia , Azerbaijan and Turkey . In Agriculture products like drip Tapes and Irrigation pipes and screw fittings we have some old customers in north Africa. For Infrastructure Pipe networks we did some project with our partner in Iraq Kurdestan Area, Sultanate of Oman, Uzbekistan and Turkmenistan.

Managing director of Vahid Industrial Group added that the company has several certificates and recommendations at the national and international levels. Among them are the noise certification from the german Fraunhofer Institute, the ISO 9001 certification, the best exporter of the province in two rounds, the best entrepreneur and the best standard production unit for several times. Also, the company's three-layer sewage pipes have received the award of the best Nano-Tech products with mass-production in the Industrial sector and they have received a nano-scale certificate from KEFA Institute.

Saeed Sheikh Hossein, Managing Director of ManaSanat Company

Many companies exported their products through ManaSanat Company

Managed by Saeed Sheikh Hossein (Hosseini), with many years of experience as one of the sales managers of the European companies Basell Europe, the ManaSanat was established and registered in Iran in 2005.

As an importer, distributor, and provider of merchandise services for chemical substance and special polymer raw material, the company is well-known and experienced in the field.

The main interest of this company is marketing in the field of import and export. The company has been active in the field of polymer additives and plastic materials for about 15 years.

Saeed Shaikh Hossein (Hosseini), Managing Director of Mana Sanat Company, said: "Currently in the market of polymer stabilizers including antioxidants, UV, HALS, and PVC stabilizers have a special place. The company distributes products of South Korea's Songwon Company.

He added that the company has taken a very effective step in transferring technology and eliminating production problems. About ten years ago, the polymer stabilizers were monopolized by Europen companies, which we put an end to the monopoly. Because they sold Polymer stabilizer products to Iran at any costs and conditions, and the effective presence of our company led the Asian countries to cooperate with Iran in this regard.

Managing director of Mana Sanat Company said: "Natural resources such as gas have created a very good field for polymer factories in Iran, and that is why some of the products are produced and sold at a very cheap price in Iran."

Hosseini, introducing the products and activities of the company, states: "Since we cooperate with manufacturing companies for export, many companies have been able to introduce and sell their products in other countries through our company."

The Managing Director of Mana Sanat Company listed the following items about the company's export activities: "The export of petrochemicals and compounds and Masterbatches to the countries of Azerbaijan, Uzbekistan, and Turkmenistan."

Speaking about project of Manaco, he added: Sun-resistant polycarbonate master batch was first produced in Iran in a joint project with manufacturing companies by Mana Sanat Company.

The use of this product is on the roof of the pedestrian bridge, as well as the construction of greenhouses. In the National project of greenhouse films, with the cooperation of a producer of Masterbatch and a greenhouse film manufacturer, the products were tripartitely tested and endorsed. The products were made via technology from South Korea and Italy.

This masterbatch is pesticide-resistant and has a strategic role in increasing the productivity of the agricultural industry, especially in drought conditions. Consultancy on the transfer of Super Absorbent Polymer production technology used in the cellulose industry, as well as consulting on the transfer of polymer

stabilizer production technology is among the companies experiences.

Mana Sanat Company is a trading company in the polymer industry, a supplier of raw materials for additives and polymers for industries such as petrochemicals, steel pipe coatings, Geomembrane polyethylene sheets, automotive polymer parts, household appliances, loose sheets, film industries, and packaging.

Mana Sanat Company is also providing it's client with services such as Toll Production, Bulk Breaking , Sourcing , Warehouse and Logistics

He points to the company's scope and says that the company's mission is to meet the demand of the upstream and downstream industries in the polymer industry to supply a variety of raw materials with priority for the addition of chemical raw materials.

Our five-year perspective is to become one of the top three companies in this industry and also becoming one of the leading companies in the field of exporting polymer materials.

Saeed Sheikh Hossein

Managing Director of ManaSanat Company

Currently Iran Ertebat Engineering Co. keeps exporting Bitumen extensively: CEO

"So far this Company is fulfilled its great duty as a powerful arm along with country's contractors by contributing in various projects such as hundreds of kilometers of gas and water pipelines, irrigation and drainage, under-pressure and low-pressure systems, sewage removal canals as well as numerous road and building construction" said Fathollah Nejabat Chief Executive Officer of Iran Ertebat Engineering Co.

According to him, Iran Ertebat Engineering Co. plays a valuable role in advancing technical and engineering services in various national projects by using the benefit of having technical staff of experienced engineers and technicians as well as utilizing up to date knowledge and technology and relying on practical experiences together with full compliance of common international standards and regulation. Mr. Nejabat is adding that the machineries which are owned by his company are including more than hundreds of bulldozers, pipe layers, trucks, loaders, graders, mixer trucks, cranes together with all kinds of light and heavy vehicles and also working place and laboratory equipment. This gives us the capability of implementing big projects simultaneously.

"This company has the ranking by Vice President of Strategic Planning and Supervision which are included "Grade 1" in the fields of Oil & Gas, "Grade 1" in the field of Road & Transportation, "Grade 1" in the field of Water & Waste-water, "Grade 3" in the field of Building Construction, "Grade 4" in the field of Maintenance & Facilities, "Grade 5" in the field of Mining Industry, "Grade 5" in the field of Power." Said Chief Executive Officer of Iran Ertebat Engineering Co. In addition, the Iran Ertebat Engineering Bitumen Refinery has started its activity in 2007 in order to produce different types of bitumen in the area of 9 hectares. Currently beyond national standards this refinery is capable of being as a part of the country's bitumen production by upgrading two aerial reactors as continuous and crossover production system with a monthly production capacity of at least 27000 tons of various bitumen grades. Based on Iran Ertebat Engineering CEO, referring to expansion of facilities in bitumen refinery of this company below is the list of all grades of bitumen produced in this refinery:

A) Penetration Grade Bitumen: This type of bitumen is classified according to its degree of permeability based on the standards. Penetration Bitumen is mostly applied in road construction industry and various types of this grade which are produced in this refinery are: 30/40, 40/50, 60/70, 85/100, 80/100, 100/150, 160/220, 200/300

B) Performance Grade Bitumen (PG): Performance bitumen is provided according to the temperature conditions of different regions and using

the most up-to-date method of the world standard. In this bitumen a degree of efficiency and functionality is defined based on standard which is fully compliant with temperature and environmental conditions. Its variants based on the high degree of efficiency are: PG46, PG 58, PG52, PG64, PG70, and PG 76.

C) Viscosity Grade Bitumen (VG): Classification of this bitumen is determined according to absolute viscosity in 60ºC based on poise and Kinematic viscosity in 130ºC based on centistokes. Different types of bitumen in this category are: VG10, VG20, VG30, and VG40

D) Emulsions Bitumen: This product is composed from mixing water with stable emulsion additives and is very good at preventing environmental pollution and is known as nature-friendly bitumen. It's classified into two groups of Cationic and Anionic and is divided to three types of Rapid Setting (CRS), Medium Setting

(CMS) and Slow Setting (CSS) based on breakdown point and setting time.

E) Modified Bitumen: This type of bitumen is producing and supplied mainly in the form of modified or oxidized bitumen according to customer requirements and special specifications for individual applications.

"Also in order to increase exporting of various grades produced in this refinery based on international standards, the barrel producing line with the capacity of 6000 barrels / day equipped with fully automated electrostatic coating system in two types of 150 g and 180 g is constructed. " CEO of Iran Ertebat Engineering Co. is explaining. In this regard and in order to guaranty the quality of products, various features such as logo and company's name engraving on the door of barrels or printing the tracking code are possible which is one of the essential factor for presenting the products of this refinery and for competing in international market.

In order to meets customer satisfaction Iran Ertebat Engineering refinery is equipped with advanced laboratory with updated facilities in the field of bitumen engineering tests. By having an international standard laboratory (Certificate of ISO17025) it's ready to respond to customers for presenting the products based on standards and acts as the reference of checking all bitumen products in the country and will keep the right of customers.

He points at export's potentials and said: This Company with almost 45 years of experience has the capability of exporting different types of mentioned bitumen based on CIF, FOB and EXW in various packing such as barrel, jumbo bag and bulk up to 1000 tons per day.

"Currently based on the activity of this company in exporting various types of bitumen, products of Iran Ertebat are exported to South Africa, Djibouti, India, Bangladesh, Turkmenistan, Georgia and Turkey." According to Mr.Nejabat.

He is mentioning the International Standards and Certificates and adds: Paying attention to quality, safety, health and environment are Iran Ertebat Engineering Co.'s first priority and by having various certificate we are committed to the following points:

"Continuous training of all staff to ensure work is done safely and to promote knowledge and skills". In fact, all of our employees are responsible to announce any danger in the workplace. Senior project managers actively participate in sites in order to ensure safety in the workplace. "Preserving the environment by implementing effective ways to manage waste and optimizing energy consumption". "Continuous efforts to maintain staff health and prevent injuries and deaths by applying quality control and safety procedures". Also all of our staff are considering paying attention to the safety as the primary principle of their work. Iran Ertebat Engineering Co.'s managers by emphasizing adherence to organizational commitments, values, effort and teamwork and by relying on accurate planning are doing lots of effort to improve the quality of this company's products.

In this regard, this company has various certificates as bellow:

European Conformity CE (1922-CPR-0296)

Environmental Management Systems (ISO 14001:2015)

Occupational Health and Safety Management Systems (OHSAS 18001: 2007)

Petroleum, Petrochemical and Natural Gas Industries Quality Management Systems (ISO\TS 29001:2010)

Health, Safety and Environmental Management System (HSE-MS)

Quality Management Systems (ISO 9001:2015)

Guidelines of projects MANAGEMENT ISO (21500:2012)

Quality Management-Guidelines for Quality Management in Projects (ISO 10006:2003)

Guidelines for complains handling in organization (ISO 10002:2014)

Iranian HSE, Approved by the "Institute of Standards & Industrial Research of Iran ISIRI"

Contractor competence and Companies Ranking Certificate

Laboratory qualification certificate (ISIRI-ISO / IEC 17025)

Sincerely Yours,

Fathollah Nejabat

General Manager

Mohammadreza Mashallahi, CEO and a member of board of directors of Zarrin Mouj Rasaneh Company

“We can produce 60 million CDs and DVDs per month”

Reezmouj System Company and Zarrin Mouj Rasaneh Company are of the first companies to produce Blank CDs in Iran, which are currently operating as the largest and most sophisticated manufacturer of CD and DVD in Iran. Mohammad Reza Mashallahi, as the project manager, established and run the Reezmouj System Company in 2003 when the country faced a $ 20 million import of CD-ROMs.

The company currently has 700 workers and is capable of employing about 1,500 people in the event of equal production of nominal capacity.

Initially, the company was the fifth largest manufacturer of the product in the world, but now it is the third largest manufacturer of CD and DVD in the world after India and Taiwan.

Mohammadreza Mashallahi, CEO and a member of board of directors of Zarrin Mouj Rasaneh Company, indicates the company’s products as below:

CD, CD-R, DVD, DVD-R, Mini-CDs, different injection plastic parts like Cap and Closures, Egg Packs, hygiene items, interior parts of Home Appliances and also different kind of CDs and DVD cases , Cake Boxes.

He points out the achievements of the company and adds: “CD Importing through the legal system came to zero by our production and followings; we created the record of $ 15 million in exports, and established a knowledge-based company. The only knowledge-based product introduced in the book of knowledge-based products is DVDs produced by the company, and the all technology purchased by the company is controlled and run by Iranian employees.

CEO and a member of the board of directors of Zarrin Mouj Rasaneh Company elaborated the goals of company establishment and continued: “One of the weaknesses and blind points in domestic production is the lack of production units and the creation of new and unique work. The purpose of the company’s establishment in Iran was simply the localization of this industry. When Reez Mouj System Company was founded in 1997, it captured the whole Middle East’s market of CD’s and DVDs through the overseas offices like the Emirates, Russia, and Sweden; we were introduced in 2003 as the largest distributor of CDs and DVDs in the Middle East.

In response to the question why the neighboring countries could not have this technology, Mashallahi said: “Our advantage is the industry’s leading position, and the very large investment level, estimated at 8 trillion rials.” 95% of raw materials are imported. Resin and polycarbonate are purchased from two large and powerful companies such as General Electric in U.S.A and the Bayer in Germany.

Referring to the company’s production capacity, he states: we can produce about 60 million CDs and DVDs per month, but now we produce about 15 million. There are also about 180 million bottle caps and closures produced in the company per year.

Mashallahi explains the domestic market and exports, and continues: Export was halved in 2018, but it reached more than $ 15 million in previous years. The entire domestic market demand is met by our company. There are 12 companies too which are active in the production of CDs and DVDs, which only 5 companies are officially operating among them.

CEO and a member of the board of directors of Zarrin Mouj Rasaneh Company refers to the international standards and says: “The Company follows CD and DVD standards and offers a product with high quality to customers. The quality of our products has led us to get a domestic incentive standard.”

Raha Pharmaceutical Company; pioneer in meeting Iran's internal medicational needs

Privately-held Raha Pharmaceutical Company was set up on a site with an area of 22.000 square metres, 7km south of the industrial and beautiful city of Isfahan, producing more than 130 pharmaceutical products in various forms in less than 10 years after its was first launched.

The company's management and experts are hard at work to play a professional role in producing quality pharmaceutical products by using the most advanced equipment through the Good Manufacturing Practice (GMP) and by putting into practice the latest pharmaceutical findings.

Possessing diverse production lines such as tablets, capsules, pellets, ampules, eye drops, nasal sprays, syrups and semisolids (creams, gels and ointments), Raha Pharma has always employed new methods for formulating new-branded products. It has tried to meet the country's needs for medicine, especially those pharmaceuticals that have recently entered the clinic use, through research, technology and innovation.

The company has been able to produce for the first time 20 new products that were never made in the country before.

Products made by Raha Pharmaceutical Company are used for treatment of such diseases as poor digestion system, cardiac insufficiency, nervous breakdown and medicines like painkillers, antihistamines, supplementary and anti-diabetics.

The company owes such great success to the R&D department, whose specialists together with their expertise and experience have made Raha Pharmaceutical a dynamic knowledge-based research center in pharmaceutical industry and also a unique center among the medical societies of the country.

As the company produces sustained-release pharmas, such products save forex expenditure of $35m each year. "We are honoured to produce such medicine as they need special technologies to be used in treatment of important diseases such as epilepsy and seizure. We also have products that help quit smoking, treat depression and eliminate kidney stone," says Gholam Reza Akhavan Farid, Raha Pharmaceutical Company Managing Director.

We are honoured to have seen a good growth in production, planning, orders, sales, marketing and quality control laboratories among Iranian pharmaceutical companies as we produce considerable number of new products per year to meet both domestic and regional countries' needs, he adds.

"Today we have made a household name for ourselves as a promising pharmaceutical company that is in line with the world knowledge, producing the best effective and quality products," according to

Akhavan Farid.

At the end, the company's management seeks to satisfy its shareholders, that is, its patients, in the first place.

The scientific personnel of Raha Pharmaceutical Company has always been trying to inform about its new products and share the latest information and pharmaceutical advances with doctors and pharmacists.

The company's products are as follows:

Products	Varieties
Tablets	56
Capsules	10
Syrups	15
Eye drops	13
Nasal sprays	14
Gels, creams and ointments	14
Ampules	9

ITMC seeks export destinations in region

Iranian Telecommunication Manufacturing Company was established in 1969 by Germany's Siemens and the then Ministry of Post, Telegraph and Telephone.

This company was launched in 1969 and later changed from a public to private company in 2003. It was later accepted into Securities and Exchange Organization (SEO) in 2004 and in 2006, 35% of its shares were given to the Justice Shares Investment Companies. So far, it has 18.000 legal and natural shareholders, making for 45% of the ITMC's floating shares.

ITMC is now in the Second Market of Iran Fara Bourse, the junior stock market, with the yellow symbol LKMA.

"The company has gone through various ups and downs during the past five decades but it has always been the first and the greatest manufacturer of telecommunication equipment in the country," says Abdulreza Rezvani, ITMC's Managing Director and its member of the Board of Director.

ITMC employs 750 expert personnel. It won Hamrah Aval's 2018 tender for power equipment, that was the biggest tender of such

equipment, worth nearly $7m.

ITMC was chosen as the top national and provincial unit for production of Smart Irrigation Planning System and Weather

Station, making it the top working group in Fars Province.

ITMC is actively engaged in production, marketing, services and support and has many affiliated units.

The company is now working on designing and manufacturing of indoor and outdoor telecommunication racks, power supply rack, transmission and battery backup cabinet, designing and production of passive equipment in Fiber to the x (FTTX) sector as well as 2kw, 3kw rectifiers, telecommunication air conditioners, designing and production of all kinds of electrical enclosure, designing and production of IoT-based products such as smart irrigation planning systems, weather stations and portable water and soil laboratories.

"ITMC is also very powerful in maintenance, improvement, support and services that has been giving services to the country's infrastructure since 2010," adds Rezvani, explaining about the company's services.

"As ITMC works with expert personnel that can repair telecommunication boards and switches, it can also give high-quality services especially now that European and Chinese companies have left Iran following the sanctions," he says, adding that maintenance, improvement and upgrading of the country's telecommunication sectors in Fars, Kerman, Bushehr, Kurdistan provinces are taken care of by ITMC.

"According to Telecommunication Infrastructure Company (TIC), we are one of their best contractors," Rezvani noted.

The other source of income for ITMC is trade activities, that is, it legally imports the equipment that are not made in Iran with good prices at a proper time.

"Currently under the sanctions, we are seeking to diversify our products and also identify and attract foreign partners with good technical know-how through joint venture to bring into Iran the technical know-how of the products that are related to us. This will not only help the domestic production but also prevents forex expenditure," according to Rezvani.

ITMC's satellite units make up the other part of its income resources and are as follows:

University of Applied Science and Technology that has 600 students in 14 majors. The university was chosen as the best academic facility of its kind in 2017.

Health clinic

Restaurant

Laboratory

Pharmacy

Language Institute

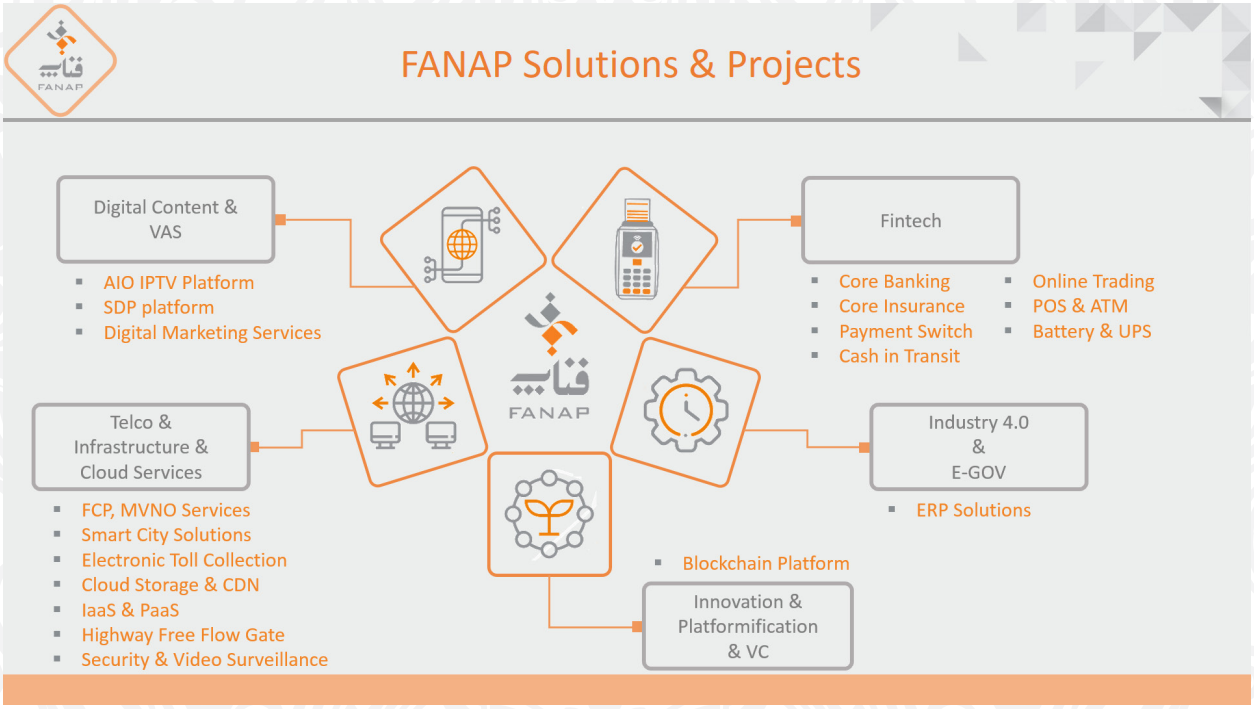
Housing cooperative

Cooperative chain stores

Sport club

Growth centre

ITMC not only wants to have a better share of the domestic market but also is considering its export markets. Its 2019 agenda sees a growth in exports through vetting its regional rivals' production, quality and price.



"To do so, we will take part in exhibitions in Erbil, Budapest, Bakutel, Syria and others," according to Rezvani, who is also a member of the company's board of directors.

The ITMC has signed a Memorandum of Understanding (MoU) with Fars Governorate, Ministry of Information and Communications Technology, Vice-presidency for Science and Technology and Attar Group to build the country's third digital park or the second innovation factory in a 14.000-square-metre site with all facilities and infrastructure. The move will attract ICT startups and then ITMC can help commercialise their products.

"Startups and knowledge-based companies are one of the ways to create jobs, as said by Iran's Supreme Leader. Building this digital economy park or the innovation factory at the ITMC site has helped us move towards a promising future for this big industrial complex," Rezvani noted.

CEO's Introduction:

FANAP offers a wide range of IT-related solutions

Shahab Javanmardy holds a PhD in Business Administration from the University of Bordeaux, France. Apart from heading FANAP Co., he recognized as an entrepreneur in the Iran's innovation ecosystem.

In October 2007, Javanmardy started his career as the CEO of FANAP Company. He also was elected as member of board of representatives during the 9th round of the Chamber of Commerce of Tehran. As a business activist, he became a member of the fourth board of directors of Tehran ICT Guild Organization, and in the next round he was elected as the deputy chairman of the board. Javanmardy won the Digital Leadership Award in 2017 and 2018 and besides that FANAP won "Iran's Annual Digital Prize" in 2018.

Education

PhD in Business Administration (DBA) - Bordeaux University of France

Master of Management (MBA) - Amir Kabir University of Technology

Master of Computer Architecture from Amirkabir University of Technology

Computer Engineering from Sharif University of Technology

Fanap's introduction:

Pasargad Arian Information Technology and Communication Co. (FANAP), was established in 2005, by Pasargad Financial Group (PFG) along with a group of IT elites of best Universities of Iran. The primary objective of the company was to support technological development of PFG.

At the beginning FANAP was focused on development of Core Banking Solutions. The company managed to develop a banking solution platform at the early stages of its operation. But gradually it started to expand its operations in other IT-related fields, namely total financial solutions including insurance and online trading, and management and processing of electronic payments which are currently being used by considerable number of Iranian banks, major state organizations, ministries, insurance firms and brokers.

Developing and implementing a smart transportation solution was the first experience of FANAP in non-financial fields then the Company expanded its services to other fields of ICT by providing value added services, mobile payment platforms, and establishment of an MVNO, Launching Iran's first IPTV, development of a domestic ERP solution (the largest software project in Iran) and launching a start-up accelerator are the other achievements of FANAP.

Currently, FANAP operates in five strategic areas:

Financial and Payment Technology;

Infrastructure and Communications Technology;

Total Organizational, Industrial and e-Government Solutions;

Digital Content Technology and Value-Added Services;

Innovation, Platformification and Venture Capital;

Today, with up to 3,500 employees, 14 offices in Tehran and 113 service offices across the country, FANAP is still working to expand the domain of services.

Products(power point file)

Honors:

Ranked 2nd in National Day of Industry and Mine 2019 awards

Acquiring knowledge-based certificate for 6 subsidiaries

Ranked 1st in 14 fields of the High Council of Informatics

Elected as a board member of Iranian ICT guild organization

Membership of FANAP's CEO at the Chamber of Commerce, Industry, Mines and Agriculture of Tehran

Ranked 114 in top Iranian companies in 2018 fiscal year

Providing banking solutions for 13 banks & financial institution

Processing more than 1 billion transactions in FANAP's payment switch

Providing cloud services for more than 13,000 online services

2.7 million subscribed users in AIO IPTV

Over 1 million subscribed users in mobile VAS

Development 1st blockchain platform in Iran

Award for Best General Performance from Bosch for Two Consecutive Years in 2017 and 2018

Best Website in the Cultural and Artistic Stores at the 11th Iranian Web & Mobile Festival.

Best Urban Transportation Application at the 11th Iranian Web & Mobile Festival

Best Mobile App at the 11th Iranian Web & Mobile Festival

Best Website in Bank and Insurance Group at the 11th Iranian Web & Mobile Festival

Best Cloud Services and Hosting Website at the 11th Iranian Web & Mobile Festival

Best Website in the Sports and Health Sector at the 11th Iranian Web & Mobile Festival

ISO 14001:2004 from CISQ/IMQ

CinnaGen to export first domestically-produced medicine to Europe

CinnaGen Managing director and board member Dr. Hamedifar: We hold international pharmaceutical standards and EU Good Manufacturing Practice (GMP) certificate

Currently 60% of the total value of foreign currency revenues from Iran's medicine exports belong to CinnaGen Pharmaceutical Group with exports to more than 15 countries worldwide. One of our objectives is to soon introduce the first Iranian manufactured medicine to European markets.

"CinnaGen Company started as a manufacturer of laboratory diagnostic kits and reagents. Following my proposal which was ratified by the board of directors, the company moved to become a bio-pharmaceutical manufacturer. By relying on the perseverance and commitment of its hard-working experts, the company turned into the biggest biopharmaceutical manufacturer in the Middle East and North Africa. At the moment some 3,150 people are working for CinnaGen Pharmaceutical Group" the CinnaGen Managing director added.

CinnaGen's first biomedicine was produced in 2006 under the trademark "CinnoVex" with the aim of curing patients with Multiple Sclerosis (MS).

Dr. Haleh Hamedifar went on to say that "CinnaGen is a knowledge-based company based on biotechnology, therefore unlike chemical pharmaceutical companies, experts at CinnaGen produce raw materials through biological and recombinant cell technology,"

"A significant number of tools and equipments are required by the company's production line, however the costs of these equipments in foreign currencies are not considerable. Therefore we are less vulnerable to sanctions in comparison with other companies because we only import a few number of items for our production line," the CinnaGen President noted.

Hamedifar referred to the current target markets of the company and added that Russia, Azerbaijan, Kazakhstan, Tajikistan, Armenia, Iraq, Syria,

Sri Lanka and Bangladesh are the main export markets of CinnaGen. "We are now aiming to expand our market in Latin America," she added.

"Acquiring the license to export medicines to other countries is a long and time-consuming process which could take between 3 to 5 years to accomplish. Some 250 cases have been registered by CinnaGen in different countries," Hamedifar reiterated.

"During the past five years wining several Best Exporter Certificates from the industries, mines and trade organization has placed CinnaGen at the centerstage of the most accredited companies of the country. Receiving the One-Star Competence Medal from the IRAMIT award in 2013 and 2014, an award of quality excellence from the fourth and fifth rounds of the national award on food, medicine and hygiene, an award on preserving the consumer rights from the Consumer and Producers Protection Organization in four straight years and also a certificate for best Research and Development center in the research and technology festival organized by the Ministry of Industry, Mines and Trade (MIMT) for three years; all testify that CinnaGen is a leading company when it comes to innovation and quality," head of Middle East's biopharmaceutical giant added while

pointing to all standard licenses obtained by the company.
